

Ⓜ Operating Instructions

Charging Kit

This power supply unit was designed specifically for iPod/iPhone/iPad that are powered via a USB connector. Using the power supply unit, iPod/iPhone/iPad can also be charged or operated without a PC or laptop.

Before using the charger, please ensure that the maximum output current of 5 V, 2100 mA is not exceeded. Of course, all other USB consumers of up to 2100 mA can also be operated with this power supply unit.

USB Travel Charger

The wide range input of 100–240 V, 50/60 Hz allows you to use it all over the world.

Depending on the continent and country, a travel adapter may possibly be required to ensure a proper connection to the country-specific power socket.

Before using your iPod/iPhone/iPad with a Hama power supply unit, please observe the information regarding the power supply in the operating instructions of your iPod/iPhone/iPad.

Unless your operating instructions explicitly inform you otherwise, proceed as follows:

1. Select the appropriate country plug and attach it to the charger properly.
2. Then push the country plug downwards until it locks into position.
3. By pressing the release button, the plug can be released again and replaced by another country plug (press and hold the release button with a pen for this purpose and push the country plug upward).
4. While it is switched off, connect the iPod/iPhone/iPad to the power supply unit in the correct direction.
5. Plug the power supply unit into the power outlet.
6. Only now should you switch your iPod/iPhone/iPad on for further use.

USB Vehicle Charger

This charger was specifically designed for devices that are powered via a USB connector, such as iPod/iPhone/iPad. Using the charger, iPod/iPhone/iPad can also be charged or operated without a PC or laptop.

Before starting, ensure that the maximum power output does not exceed 5 V, 2100 mA. Of course, the charger can also be used with all other USB devices up to 2100 mA.

Before using your iPod/iPhone/iPad with the Hama charger, please be sure to read the information regarding power supply in your iPod/iPhone/iPad operating instructions.

Unless your operating instructions explicitly inform you otherwise, proceed as follows:

1. While it is switched off, connect the iPod/iPhone/iPad player to the charger.
2. Insert the vehicle charger into the cigarette lighter socket.
3. Only now should you switch your iPod/iPhone/iPad player on for further use.

When charging batteries within the iPod/iPhone/iPad, pay attention to the maximum charging times for the built-in batteries!

When recharging, please also observe the enclosed safety and disposal instructions!
