

Cupboards which are environmentally friendly

The A491 range of cupboards have been awarded the NF environmental certificate, are manufactured in compliance with the most demanding environmental standards & boasts a total recycling rate of over 97%. NF environmental certification is based on ISO 14024.

The A491 cupboards are manufactured in facilities which rigorously observe the regulations applicable to facilities rated with the environmental protection certification (ICPE). Vinco Industrie demonstrates its commitment to the environment throughout the design and manufacture of its cupboards.

On the production site there is:

- *strict management of waste through recycling procedures, selective sorting, monitoring of energy use and disposal.
- *no liquid waste

At the design stage:

- *paint which is free from all heavy metals (cadmium, lead, chromium VI, mercury and arsenic) and PVC, with a minimal production of volatile organic compounds
- *polypropylene tambours
- *easily recycled or reusable packaging

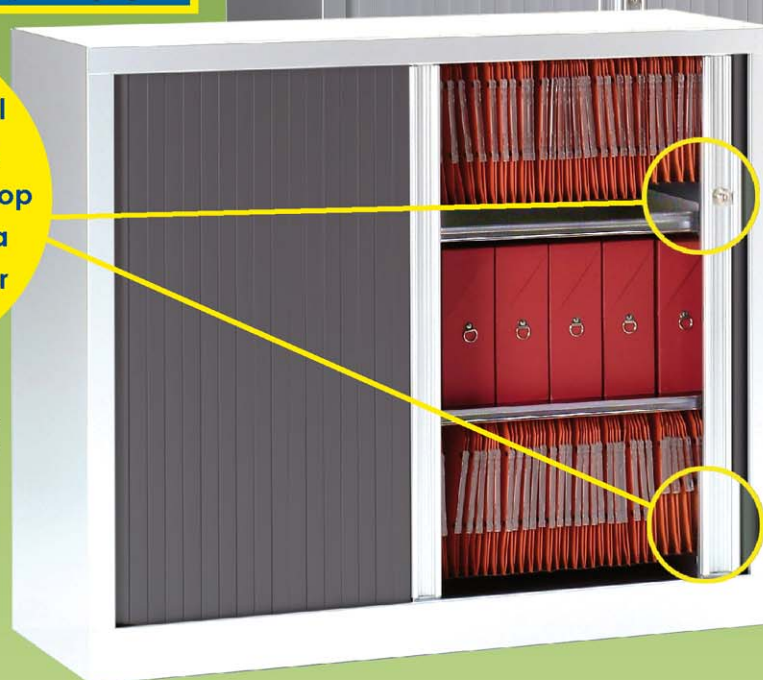

Recyclable
polypropylene
tambours

H44 x W100cms
Aluminium shell
Aluminium doors,
code GPP0410AL

H198 x W100cms
Aluminium shell
Aluminium doors,
code GAP1910AL

H198cms
and H160cms
have a 3 point
central locking
door system

H100cms
have a 2 point central
locking door system.
Lock located near the top
of the unit, providing a
comfortable height for
lock operation

H100 x W100cms
White shell
Graphite doors,
code GAP1010BLBS
