Kensington

SafeDock™ for MackBook® Air 11" Security Dock & Keyed Lock

K67758EU

Product Description

The top selling MacBook® Air ultrabook is sleek, powerful and incredibly light. However, the MacBook Air has one shortcoming: it doesn't have an integrated Kensington security slot, so whilst you don't want to lose it, there's no way of locking it.

The Kensington SafeDock™ MacBook® Air Security Dock & Keyed Lock offers a sleek, yet strong, stylish security solution designed for your workstation. Simply slide your MacBook Air into the SafeDock and flip up the security gate to expose the ClickSafe Security Anchor. Then attach the included Kensington ClickSafe® lock to secure your MacBook Air.

The SafeDock is so light and slim that it fits easily in a sleeve or travel bag. And when you reach your destination, simply attach your ClickSafe lock with one-click and you're secure.

The SafeDock offers personalised ergonomics with an integrated 4" stand to tilt the MacBook Air. The SafeDock can also be attached to a VESA mount for elevatated use on a monitor arm for instance. When mounted in this way the MacBook Air itself prevents access to the mounting screws providing a secure solution for use in public or shared environments. Naturally, the SafeDock preserves access to all of the MacBook Air ports.

Plus the SafeDock also preserves the MacBook Air's aesthetics by utilizing a slim, minimalist design with a brushed aluminum security bar that complements the MacBook Air.
