

# Floorscreen 16:10 1600x1000

1902551

## Overview

This almost magical carry case turns into a full-sized projection screen in less than 5 seconds. The lightweight aluminium design is ideal for the travelling presenter or for use in meeting rooms where a screen cannot be attached to the wall. To set-up: swivel the feet of the integrated case to the front, release the catches and open case and then simply pull the screen up to the desired height. The pressurised air system behind screen gives it maximum stability and requires no fastening. To put away: simply push back down the screen into the integral robust carry case.

## Description

Choosing the right screen is crucial to get the most out of your wide format DLP® projector. If you are looking for a light, portable screen that can be set up in seconds and gives quality, 'big screen' viewing performance for a medium sized audience, then the Nobo wide format, floor-standing Projection Screen is the ideal choice. Neat and contemporary yet stable and robust, it comes with a 1 year manufacturer's warranty so you can purchase with total confidence.

Professional: the clean, modern design of this all-in-one projection screen will add a stylish touch to any meeting room. The brilliant matt white screen provides a sharp, detailed image that can easily be seen by everyone in the audience, plus crisp colours enhanced by the contrasting black

border.

Simple: it takes seconds to pull the screen up from its aluminium case that also acts as a sturdy base with fold-out feet. Screen height can be adjusted effortlessly; no complicated user manual is required. There are no fiddly clamps either - simply a self-supporting, rear scissor mechanism that holds the screen firmly in place and keeps it taut.

Compact: this Nobo Screen takes up less space than a traditional tripod screen and looks much neater. It rolls back into a light but sturdy snooker-cue style aluminium carry case with integrated carry handle. Measuring 120mm (H) x 120mm (D) x 1750 mm (L) and weighing just 12kg, the case is easy to store and transport.

The Nobo wide format, floor-standing Projection Screen is compatible with wide format projectors such as the Nobo WX2 DLP®. The 16:10 screen is the same format as a widescreen TV or DVD player and is ideal for bringing multi-media presentations to life. It will optimise your projector's DLP® imaging technology to give brighter, more consistent picture quality and superb black and white contrast. The 150° viewing angle means that everyone in the audience can participate, ensuring your presentations are professional, memorable and effective.

## Features

- Highly flexible screen for use anywhere
- 1 year guarantee
- Black border provides a sharp, detailed image
- Brilliant matt white projection screen surface for high quality colour projection
