ENERJSMART

Specification	
Shell Material	PC + ABS
Block Size	L*B*H=265*66*40mm
Cable Length	1.8m
Weight	375g
Rated Input Power	10A, 100V-250V
Rated Power	2200W
USB Output Rated Power	5V/4A
USB Output Voltage	4.75V~5.25V
Working Temperature	-40°~40°
Working Humidity	≤95%
Storage Temperature	-35°~60°

ENER-J's energy saving UK Power Extension Lead has following features

Wi-Fi Control: The 3 AC outlets can be controlled separately and the 4 USB charging ports can be controlled together by APP on your phone remotely. So you can control your electronic devices in your home wherever you go.

SAFELY POWER YOUR HOME: 3 AC ports with surge protector provide maximum protection for all of your home electronics. Fireproof shell houses and protects high-performance electrical components.

SMART QUICK-CHARGING TECHNOLOGY: Even power distribution ensures devices are fully charged when you need them. Sends the right amount of current your device needs, which allows for high-speed charging and extends the life of your electronics. Four 2.4A USB ports available to charge your mobile devices; when all four USB ports are used at once, each port uses 1A each. (30 Watts rated power, max current 4A).

INTUITIVE INDICATOR LIGHT: Each AC Power button lights up when the corresponding power socket is on; it will also show on your phone synchronously. **ALWAYS STAY SAFE:** Equipped with overload, overheating, surge, and short-circuit protection to ensure extended usage.
