

# SAFETY DATA SHEET

## 2Work Whiteboard Renovator Spray

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of the substance/mixture and of the company/undertaking		
1.1. Product identifier		
Product name	2Work Whiteboard Renovator Spray	
Product number	DB50839	
1.2. Relevant identified uses o	f the substance or mixture and uses advised against	
Identified uses	Detergent.	
Uses advised against	No specific uses advised against are identified.	
1.3. Details of the supplier of the	he safety data sheet	
Supplier	VOW EUROPE LTD MAGNA PARK HARRIER PARKWAY LUTTERWORTH LE17 4XT 0844 980 8000 WWW.VOWEUROPE.COM	
1.4. Emergency telephone nur	nber	

## Emergency telephone IN CASE OF EMERGENCY CALL: +44 1865 407333 (24hr, Provided by Carechem 24) +353 (0)1 809 2166 (Beaumont Hospital, Republic of Ireland only, 8am-10pm, 7 days a week)

### **SECTION 2: Hazards identification**

## 2.1. Classification of the substance or mixture

Classification (EC 1272/2008)	
Physical hazards	Aerosol 1 - H222, H229
Health hazards	Eye Irrit. 2 - H319
Environmental hazards	Not Classified

## 2.2. Label elements

Hazard pictograms

Signal word	Danger
Hazard statements	H222 Extremely flammable aerosol. H229 Pressurised container: may burst if heated. H319 Causes serious eye irritation.

Precautionary statements	<ul> <li>P101 If medical advice is needed, have product container or label at hand.</li> <li>P102 Keep out of reach of children.</li> <li>P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P211 Do not spray on an open flame or other ignition source.</li> <li>P251 Do not pierce or burn, even after use.</li> <li>P280 Wear eye protection.</li> <li>P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.</li> <li>P501 Dispose of contents/ container in accordance with national regulations.</li> </ul>
Detergent labelling	< 5% aliphatic hydrocarbons, < 5% EDTA and salts thereof
Supplementary precautionary statements	P337+P313 If eye irritation persists: Get medical advice/ attention.

## 2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

## SECTION 3: Composition/information on ingredients

2-Butoxyethanol			1-5%
CAS number: 111-76-2	EC number: 203-905-0	REACH registration number: 01- 2119475108-36-XXXX	
Classification			
Acute Tox. 4 - H302			
Acute Tox. 4 - H312			
Acute Tox. 4 - H332			
Skin Irrit. 2 - H315			
Eye Irrit. 2 - H319			
Petroleum gases, liquefied			1-5%
CAS number: 68476-85-7	EC number: 270-704-2		
Classification			
Flam. Gas 1 - H220			
Press. Gas			
Muta. 1B - H340			
Carc. 1A - H350			
Tetrasodium ethylene diamine tet	raacetate		1-5%
CAS number: 64-02-8	EC number: 200-573-9	REACH registration number: 01- 2119486762-27-XXXX	
Classification			
Acute Tox. 4 - H302			
Eye Dam. 1 - H318			

Morpholine			<1%
CAS number: 110-91-8	EC number: 203-815-1	REACH registration number: 01- 2119496057-30-0001	
Classification			
Flam. Liq. 3 - H226			
Acute Tox. 4 - H302			
Acute Tox. 4 - H312			
Acute Tox. 4 - H332			
Skin Corr. 1B - H314			
Eye Dam. 1 - H318			
Sodium nitrite			<1%
CAS number: 7632-00-0	EC number: 231-555-9	REACH registration number: 01- 2119471836-27-XXXX	
M factor (Acute) = 1			
Classification			
Ox. Sol. 3 - H272			
Acute Tox. 3 - H301			
Aquatic Acute 1 - H400			
Sadium hydrovida			<1%
Sodium hydroxide			<b>\$1%</b>
CAS number: 1310-73-2	EC number: 215-185-5		
Classification			
Skin Corr. 1A - H314			

### **SECTION 4: First aid measures**

## 4.1. Description of first aid measures

General information	Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.
Inhalation	Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Skin contact	Rinse with water.

Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.
4.2. Most important symptoms	and effects, both acute and delayed
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	Spray/mists may cause respiratory tract irritation.
Ingestion	Due to the physical nature of this product, it is unlikely that ingestion will occur.
Skin contact	Repeated exposure may cause skin dryness or cracking.
Eye contact	Irritating to eyes.
4.3. Indication of any immedia	te medical attention and special treatment needed
Notes for the doctor	Treat symptomatically.
SECTION 5: Firefighting meas	sures
5.1. Extinguishing media	
Suitable extinguishing media	The product is flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising fr	om the substance or mixture
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up. Bursting aerosol containers may be propelled from a fire at high speed. If aerosol cans are ruptured, care should be taken due to the rapid escape of the pressurised contents and propellant. Vapours may form explosive mixtures with air.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
5.3. Advice for firefighters	
Protective actions during firefighting	Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Evacuate area. Risk of explosion. Provide adequate ventilation. No smoking, sparks, flames or other sources of ignition near spillage. Promptly remove any clothing that becomes contaminated.

#### 6.2. Environmental precautions

Environmental precautions Avoid discharge into drains or watercourses or onto the ground.

#### 6.3. Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Eliminate all ignition sources if safe to do so. No smoking, sparks, flames or other sources of ignition near spillage. Under normal conditions of handling and storage, spillages from aerosol containers are unlikely. If aerosol cans are ruptured, care should be taken due to the rapid escape of the pressurised contents and propellant. Small Spillages: Wipe up with an absorbent cloth and dispose of waste safely. Large Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. For waste disposal, see Section 13.

#### 6.4. Reference to other sections

Reference to other sections For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

#### SECTION 7: Handling and storage

7.1. Precautions for safe h	nandling
Usage precautions	Keep out of the reach of children. Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Avoid exposing aerosol containers to high temperatures or direct sunlight. The product is flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Spray will evaporate and cool rapidly and may cause frostbite or cold burns if in contact with skin. Avoid contact with eyes. Avoid inhalation of vapours and spray/mists.
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.
7.2. Conditions for safe st	orage, including any incompatibilities
Storage precautions	Store away from incompatible materials (see Section 10). Keep away from oxidising materials,

heat and flames. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Protect from sunlight. Do not store near heat sources or expose to high temperatures. Do not expose to temperatures exceeding 50°C/122°F. Bund storage facilities to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.

Storage class	Chemical storage.

7.3. Specific end use(s)

Specific end use(s)

The identified uses for this product are detailed in Section 1.2.

## SECTION 8: Exposure controls/Personal protection

#### 8.1. Control parameters

#### Occupational exposure limits

#### 2-Butoxyethanol

Long-term exposure limit (8-hour TWA): WEL 25 ppm 123 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 50 ppm 246 mg/m<sup>3</sup> Sk

### Petroleum gases, liquefied

Long-term exposure limit (8-hour TWA): WEL 1000 ppm 1750 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 1250 ppm 2180 mg/m<sup>3</sup>

#### Morpholine

Long-term exposure limit (8-hour TWA): WEL 10 ppm 36 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 20 ppm 72 mg/m<sup>3</sup> Sk

#### Sodium hydroxide

Short-term exposure limit (15-minute): WEL 2 mg/m<sup>3</sup> WEL = Workplace Exposure Limit Sk = Can be absorbed through the skin.

### 8.2. Exposure controls

Protective equipment

Appropriate engineering controls	Provide adequate ventilation. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Wear tight-fitting, chemical splash goggles or face shield. If inhalation hazards exist, a full-face respirator may be required instead.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.

Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Preventive industrial medical examinations should be carried out. Warn cleaning personnel of any hazardous properties of the product.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140.
Environmental exposure controls	Keep container tightly sealed when not in use.

## SECTION 9: Physical and chemical properties

## 9.1. Information on basic physical and chemical properties

Appearance	Aerosol.
Colour	No data available.
Odour	No data available.
Odour threshold	Not available.
рН	Not available.
Melting point	Not available.
Initial boiling point and range	Not available.
Flash point	Not available.
Evaporation rate	Not available.
Flammability (solid, gas)	No specific test data are available. Extremely flammable aerosol.
Upper/lower flammability or explosive limits	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	Not available.
Solubility(ies)	Soluble in water.
Partition coefficient	Not available.
Auto-ignition temperature	Not available.
Decomposition Temperature	Not available.
Viscosity	Not available.
Explosive properties	Not considered to be explosive.
Oxidising properties	Does not meet the criteria for classification as oxidising.
9.2. Other information	

Other information	No information required.	
SECTION 10: Stability and reactivity		
10.1. Reactivity		
Reactivity	See the other subsections of this section for further details.	
10.2. Chemical stability		
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.	
10.3. Possibility of hazardous	reactions	
Possibility of hazardous reactions	The following materials may react strongly with the product: Oxidising agents.	
10.4. Conditions to avoid		
Conditions to avoid	Avoid exposing aerosol containers to high temperatures or direct sunlight. Pressurised container: may burst if heated	
10.5. Incompatible materials		
Materials to avoid	No specific material or group of materials is likely to react with the product to produce a hazardous situation.	
10.6. Hazardous decompositio	on products	
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.	
SECTION 11: Toxicological inf	formation	
11.1. Information on toxicologi	cal effects	
Acute toxicity - oral		
Notes (oral LD₅o)	Based on available data the classification criteria are not met.	
ATE oral (mg/kg)	20,185.44	
<u>Acute toxicity - dermal</u> Notes (dermal LD₅₀)	Based on available data the classification criteria are not met.	
ATE dermal (mg/kg)	17,407.6	
Acute toxicity - inhalation	1,101.0	
Notes (inhalation LC <sub>50</sub> )	Based on available data the classification criteria are not met.	
ATE inhalation (vapours mg/l)	190.94	
ATE inhalation (dusts/mists mg/l)	107.15	
Skin corrosion/irritation Animal data	Based on available data the classification criteria are not met.	
Serious eye damage/irritation Serious eye damage/irritation	Causes serious eye irritation.	
Respiratory sensitisation Respiratory sensitisation	Based on available data the classification criteria are not met.	
Skin sensitisation		

Skin sensitisation	Based on available data the classification criteria are not met.	
Germ cell mutagenicity Genotoxicity - in vitro	Based on available data the classification criteria are not met.	
Carcinogenicity Carcinogenicity	Based on available data the classification criteria are not met.	
IARC carcinogenicity	None of the ingredients are listed or exempt.	
Reproductive toxicity Reproductive toxicity - fertility Reproductive toxicity -	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met.	
development		
Specific target organ toxicity -	single exposure	
STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure.	
Specific target organ toxicity -	repeated exposure	
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.	
Aspiration hazard Aspiration hazard	Based on available data the classification criteria are not met.	
General information	The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
Inhalation	Spray/mists may cause respiratory tract irritation.	
Ingestion	Due to the physical nature of this product, it is unlikely that ingestion will occur.	
Skin contact	Repeated exposure may cause skin dryness or cracking.	
Eye contact	Irritating to eyes.	
Route of exposure	Ingestion Inhalation Skin and/or eye contact	
Target organs	No specific target organs known.	
Toxicological information on ingredients.		

2-Butoxyethanol

Acute toxicity - oral	
Notes (oral LD₅₀)	Acute Tox. 4 - H302 Harmful if swallowed.
ATE oral (mg/kg)	500.0
Acute toxicity - dermal	
Notes (dermal LD <sub>50</sub> )	Acute Tox. 4 - H312 Harmful in contact with skin.
ATE dermal (mg/kg)	1,100.0
Acute toxicity - inhalation	
Notes (inhalation LC <sub>50</sub> )	Acute Tox. 4 - H332 Harmful if inhaled.
ATE inhalation (vapours mg/l)	11.0
Skin corrosion/irritation	

Animal data	Irritating.		
Serious eye damage/irritation			
Serious eye damage/irritation	Causes serious eye irritation.		
Respiratory sensitisation			
Respiratory sensitisation	Based on available data the classification criteria are not met.		
Skin sensitisation			
Skin sensitisation	Based on available data the classification criteria are not met.		
Germ cell mutagenicity			
Genotoxicity - in vitro	Based on available data the classification criteria are not met.		
Genotoxicity - in vivo	Chromosome aberration: Negative. REACH dossier information. Based on available data the classification criteria are not met.		
Carcinogenicity			
Carcinogenicity	Based on available data the classification criteria are not met.		
IARC carcinogenicity	None of the ingredients are listed or exempt.		
Reproductive toxicity			
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.		
Reproductive toxicity - development	Based on available data the classification criteria are not met.		
Specific target organ toxici	ty - single exposure		
STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure.		
Specific target organ toxici	ty - repeated exposure		
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.		
Aspiration hazard			
Aspiration hazard	Based on available data the classification criteria are not met.		
General information	The severity of the symptoms described will vary dependent on the concentration and the length of exposure.		
Inhalation	A single exposure may cause the following adverse effects: Headache. Exhaustion and weakness.		
Ingestion	May cause discomfort if swallowed. Stomach pain. Nausea, vomiting.		
Skin contact	Redness. Irritating to skin.		
Eye contact	Irritating to eyes.		
Route of exposure	Ingestion Inhalation Skin and/or eye contact		
Target organs	No specific target organs known.		

## Petroleum gases, liquefied

Toxicological effects	Not regarded as a health hazard under current legislation.
Acute toxicity - oral	
Notes (oral LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - dermal	
Notes (dermal LD <sub>50</sub> )	Based on available data the classification criteria are not met.
Acute toxicity - inhalation

However, large or frequent spills may have hazardous effects on the environment. <u>Petroleum gases, liquefied</u> Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment. <u>Tetrasodium ethylene diamine tetraacetate</u> Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment.

Toxicity	Based on available data the classification criteria are not met.

Acute aquatic toxicity

Acute	toxicity - fish	$LC_{50}$ , 96 hours: 1474 mg/l, Oncorhynchus mykiss (Rainbow trout)
Acute t inverte	oxicity - aquatic brates	EC₅₀, 48 hours: 1550 mg/l, Daphnia magna
Acute t plants	oxicity - aquatic	EC₅₀, 72 hours: 911 mg/l, Pseudokirchneriella subcapitata
Chroni	c aquatic toxicity	
Chroni life stag	• •	NOEL, 21 days: >100 mg/l, Brachydanio rerio (Zebra Fish)
Chroni inverte	c toxicity - aquatic brates	NOEC, 21 days: 100 mg/l, Daphnia magna
		Petroleum gases, liquefied
Toxicit	y	Based on available data the classification criteria are not met.
Acute	aquatic toxicity	
Acute	oxicity - fish	LC₅₀, 96 hours: 147.54 mg/l, Freshwater fish Estimated value.
Acute 1 inverte	toxicity - aquatic brates	EC₅₀, 48 hours: 16.33 mg/l, Daphnia magna Estimated value.
Acute t plants	oxicity - aquatic	EC₅₀, 96 hours: 11.89 mg/l, Freshwater algae Estimated value.
		Tetrasodium ethylene diamine tetraacetate
Toxicit	y	Based on available data the classification criteria are not met.
Acute	aquatic toxicity	
Acute	toxicity - fish	$LC_{50}$ , 96 hours: 121 mg/l, Lepomis macrochirus (Bluegill)
Acute t inverte	toxicity - aquatic brates	EC₅₀, 24 hours: 625 mg/l, Daphnia magna
Acute t plants	oxicity - aquatic	EC₅₀, 72 hours: 2.77 mg/l, Scenedesmus subspicatus
Chroni	c aquatic toxicity	
Chroni life sta	•	NOEC, 35 days: >25.7 mg/l, Brachydanio rerio (Zebra Fish)
Chroni inverte	c toxicity - aquatic brates	NOEC, 21 days: 25 mg/l, Daphnia magna
12.2. Persistence ar	nd degradability	

Persistence and degradability The surfactant(s) contained in this product complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No. 648/2004 on detergents.

Ecological information on ingredients.

## 2-Butoxyethanol

Persistence and degradability

The degradability of the product is not known.

	Biodegradation	Water - Degradation 90.4%: 28 days
		Petroleum gases, liquefied
	Persistence and degradability	The degradability of the product is not known.
	Biodegradation	Water - Degradation 100%: 385.5 hours
		Tetrasodium ethylene diamine tetraacetate
	Persistence and degradability	The degradability of the product is not known.
	Phototransformation	Water - DT₅₀ : 2.12 hours
	Biodegradation	Water - Degradation <10%: 28 days
12.3. Bioaco	cumulative potential	
Bioaccumula	ative potential No da	ta available on bioaccumulation.
Partition coe	efficient Not a	vailable.
Ecological in	nformation on ingredients.	
		2-Butoxyethanol
	Bioaccumulative potentia	al No data available on bioaccumulation.
	Partition coefficient	log Kow: 0.81
		Petroleum gases, liquefied
	Bioaccumulative potentia	al No data available on bioaccumulation.
		Tetrasodium ethylene diamine tetraacetate
	Bioaccumulative potentia	al No data available on bioaccumulation.
12.4. Mobilit	ty in soil	
Mobility	The product contains volatile organic compounds (VOCs) which will evaporate easily from all surfaces.	
Ecological in	nformation on ingredients.	
		2-Butoxyethanol
	Mobility	No data available.
	Surface tension	29.53 mN/m @ 20°C
		Petroleum gases, liquefied
	Mobility	Not relevant.
		Tetrasodium ethylene diamine tetraacetate
	Mobility	No data available.

Adsorption/desc coefficient	water - Log Koc: 3.02 @ 20°C Estimated value.	
12.5. Results of PBT and vPvB assessment		
Results of PBT and vPvB	This product does not contain any substances classified as PBT or vP	

**Results of PBT and vPvB** This product does not contain any substances classified as PBT or vPvB. assessment

Ecological information on ingredients.

#### 2-Butoxyethanol

**Results of PBT and vPvB** This substance is not classified as PBT or vPvB according to current EU criteria. assessment

#### Petroleum gases, liquefied

**Results of PBT and vPvB** This substance is not classified as PBT or vPvB according to current EU criteria. assessment

#### Tetrasodium ethylene diamine tetraacetate

**Results of PBT and vPvB** This substance is not classified as PBT or vPvB according to current EU criteria. assessment

#### 12.6. Other adverse effects

Other adverse effects None known.

Ecological information on ingredients.

2-Butoxyethanol

Other adverse effects None known.

None known.

Petroleum gases, liquefied

Other adverse effects

Tetrasodium ethylene diamine tetraacetate

Other adverse effects None known.

## SECTION 13: Disposal considerations

#### 13.1. Waste treatment methods

General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.
Disposal methods	Empty containers must not be punctured or incinerated because of the risk of an explosion. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents.

SECTION 14: Transport information		
14.1. UN number		
UN No. (ADR/RID)	1950	
UN No. (IMDG)	1950	
UN No. (ICAO)	1950	
UN No. (ADN)	1950	
14.2. UN proper shipping name	9	
Proper shipping name (ADR/RID)	AEROSOLS	
Proper shipping name (IMDG)	AEROSOLS	
Proper shipping name (ICAO)	AEROSOLS	
Proper shipping name (ADN)	AEROSOLS	
14.3. Transport hazard class(e	<u>s)</u>	
ADR/RID class	2.1	
ADR/RID classification code	5F	
ADR/RID label	2.1	
IMDG class	2.1	
ICAO class/division	2.1	
ADN class	2.1	

### **Transport labels**

### 14.4. Packing group

None.

## 14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant No.

### 14.6. Special precautions for user

Always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

EmS	F-D, S-U
ADR transport category	2
Tunnel restriction code	(D)

### 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

## Transport in bulk according to Not relevant. Annex II of MARPOL 73/78 and the IBC Code

### SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture		
National regulations	Health and Safety at Work etc. Act 1974 (as amended). The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2009 (SI 2009 No. 1348) (as amended) ["CDG 2009"]. EH40/2005 Workplace exposure limits. The Aerosol Dispensers Regulations 2009 (SI 2009 No. 2824).	
EU legislation	<ul> <li>Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18</li> <li>December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended).</li> <li>Commission Regulation (EU) No 2015/830 of 28 May 2015.</li> <li>Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16</li> <li>December 2008 on classification, labelling and packaging of substances and mixtures (as amended).</li> <li>Regulation (EC) No 648/2004 of the European Parliament and of the Council of 31 March 2004 on detergents (as amended).</li> <li>Council Directive of 20 May 1975 on the approximation of the laws of the Member States relating to aerosol dispensers (75/324/EEC) (as amended).</li> </ul>	

### 15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

### Inventories

#### **EU - EINECS/ELINCS**

None of the ingredients are listed or exempt.

## SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet	<ul> <li>ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.</li> <li>ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways.</li> <li>RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail.</li> <li>IATA: International Air Transport Association.</li> <li>ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air.</li> <li>IMDG: International Maritime Dangerous Goods.</li> <li>CAS: Chemical Abstracts Service.</li> <li>ATE: Acute Toxicity Estimate.</li> <li>LC<sub>50</sub>: Lethal Concentration to 50 % of a test population.</li> <li>LD<sub>50</sub>: Lethal Dose to 50% of a test population (Median Lethal Dose).</li> <li>EC<sub>50</sub>: 50% of maximal Effective Concentration.</li> <li>PBT: Persistent, Bioaccumulative and Toxic substance.</li> <li>vPvB: Very Persistent and Very Bioaccumulative.</li> </ul>
Classification abbreviations and acronyms	Aerosol = Aerosol Eye Irrit. = Eye irritation
Classification procedures according to Regulation (EC) 1272/2008	Eye Irrit. 2 - H319: : Calculation method. Aerosol 1 - H222, H229: : Expert judgement.

Training advice	Read and follow manufacturer's recommendations. Only trained personnel should use this material.
Issued by	Toni Ashford
Revision date	05/12/2018
Revision	2.1
SDS number	1601
Hazard statements in full	<ul> <li>H220 Extremely flammable gas.</li> <li>H222 Extremely flammable aerosol.</li> <li>H226 Flammable liquid and vapour.</li> <li>H229 Pressurised container: may burst if heated.</li> <li>H272 May intensify fire; oxidiser.</li> <li>H280 Contains gas under pressure; may explode if heated.</li> <li>H301 Toxic if swallowed.</li> <li>H302 Harmful if swallowed.</li> <li>H311 Toxic in contact with skin.</li> <li>H312 Harmful in contact with skin.</li> <li>H314 Causes severe skin burns and eye damage.</li> <li>H315 Causes skin irritation.</li> <li>H318 Causes serious eye damage.</li> <li>H319 Toxic if inhaled.</li> <li>H332 Harmful if inhaled.</li> <li>H333 May cause damage to organs (Respiratory tract) through prolonged or repeated exposure if inhaled.</li> <li>H400 Very toxic to aquatic life.</li> </ul>
