

Swordfish Laminators

Preserve • Present • Protect

"Because some things
are irreplaceable"

Lucy knows that Ella will never draw the same picture again. That's why she laminates Ella's drawings to **preserve** them for the future.

"Because first impressions count"

Alex and Sophie realize that professional presentation is key to winning clients. That's why they laminate their proposals before they **present** at client meetings.

"Because everything isn't
handled with care"

James knows that his customers expect excellent service all round. That's why he laminates his menus to **protect** them from daily use, keeping them crisp and clean.

Laminate your documents for long-lasting benefits. Pictures will look glossy and brighter, signs last longer, and calendars, menus and maps can be written on and wiped clean again and again.
