

Obsolete Material Information

The product about which you have inquired is no longer sold by Xerox and is therefore “obsolete”. Safety Data Sheets for obsolete products are no longer available. The following handling, storage and disposal information is provided as a convenience.

Handling

Xerox® toner and dry ink products are non-hazardous materials. Therefore, no special handling instructions are required.

Generally safe handling practices should be followed for all materials.

- Ensure adequate ventilation
- In the case of a powdered material (such as toner), avoid dust accumulation in enclosed spaces and prevent creation of a dust cloud while handling.
- For liquid materials, avoid the formation of vapors, mists or aerosols.

Storage

Containers should be kept tightly closed at room temperature in a dry and well-ventilated area.

Disposal

- Toner and dry ink products, as supplied, are non-hazardous waste but could become a hazardous waste if mixed with other hazardous materials.
- Do not dispose of waste in the sewer.
- Waste materials and packaging should be disposed of in accordance with applicable federal, state and local environmental control laws and regulations.
 - Liquid ink packaging should be taken to an approved waste handling site for recycling or disposal.

Transportation

Toner and dry ink materials are not regulated as hazardous material for shipping.
