

6. Ready to use for MAC

1. Once your drive is connected to your Mac and unlocked, OSx will recognise the disk as unreadable.

2. Select the button "Initialise..." to start Disk Utility.

3. In Disk Utility you need to select the specific external disk.

Note: the Secure Desktop Hard Drive Enclosure with Keypad Access will lose its original type description, name and branding. We recommend disconnecting all other external volumes. Do not select any internal volumes.

4. Select the only external disk available.

5. Choose Erase from the Disk Utility tool bar to get to the formatting dialog box.

6. In the next dialog box you can assign a drive name and a file format.

Note

The drive can be connected to USB 3.1 GEN 1 / USB 3.0 and USB 2.0 ports.

For optimal performance the device must be connected to a USB 3.1 GEN 1 / USB 3.0 port.

Before first use, it is recommended to save all preloaded files from the device to your computer's internal hard drive.

For Mac users it is recommended to format the device in Mac OS Extended.

ⓘ (繁體中文) 注意：快速啟用資訊只是讓您在初次使用 Verbatim 產品 時有個簡略的連線概念。在第一次使用此硬碟前，請仔細閱讀(產品)內附的安全及使用者手冊。

ⓘ (简体中文) 注意：快速入门信息只为您提供连接和首次使用 Verbatim 产品的基本知识。在首次使用此硬盘之前，请务必仔细阅读所有附带的手册（产品）和入门指南。

ⓘ 주의: 빠른 시작 정보는 버batim 장치의 연결 및 첫 번째 사용에 대한 사전 정보를 제공합니다. 처음 드라이브를 사용하기 전에 제품에 동봉된 모든 매뉴얼 및 안내 등을 주의 깊게 읽어보시기 바랍니다.

QUICK INSTALL GUIDE

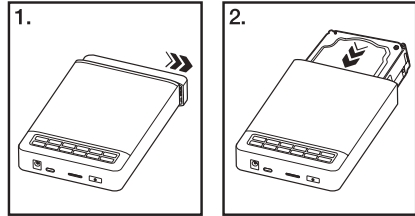

Secure Desktop Hard Drive Enclosure with Keypad Access

1904

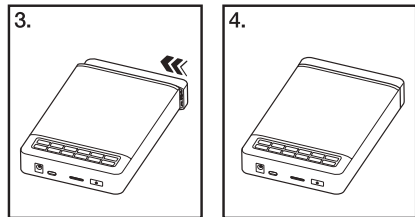

A Group Company of  MITSUBISHI CHEMICAL

1. HDD Installation

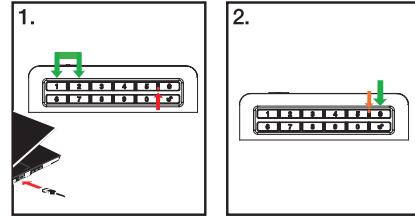

1. Slide open rear compartment.
2. Insert SATA 3.5" hard drive.

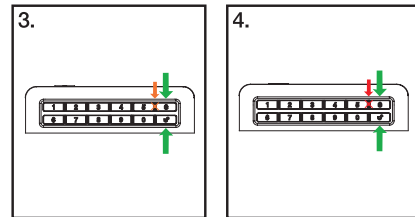

3. Replace rear compartment cover.
4. The HDD is now ready to use.

Note: For your own security we highly recommend you change the default passcode.

2. Set up Passcode

1. Press and hold **key 1** and **2** simultaneously, then connect the USB Cable with drive and your computer. Release both keys as soon as the **red LED** next to the Lock key lights up.
2. Now press "**Lock**" for 5 seconds until the **orange LED** lights up.

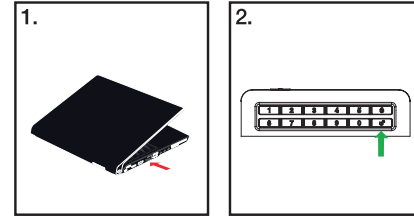

3. Type your new passcode and confirm by pressing "**Lock**" and retype your new passcode and press "**Unlock**" the **orange LED** will turn off.
4. Retype your new passcode and press "**Unlock**", the **red LED** turns off and is unlocked now.

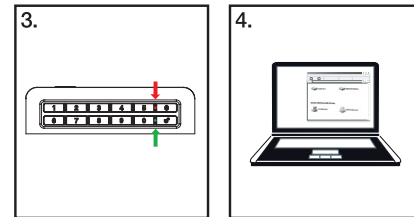

Note: Please back up your data before setting a new passcode. To the safety of your data, setting a new passcode will initialise the drive, to format the drive please follow the steps revised under "Ready to use."

Note: Passcode must be between 5 and 12 digits long.

3. Hardware Operation

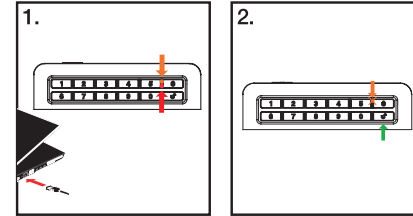

1. Connect the encrypted HDD to your computer.
2. Enter passcode, then press "**Unlock**" button to confirm it.

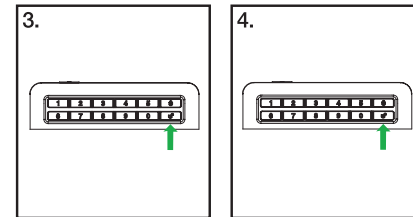

3. At this time the **red LED** should remain off and the **green LED** should be lit. The HDD has been unlocked successfully.
4. Open "My Computer" to see your external HDD is ready to use.

4. Change Passcode

1. Press and hold "**Lock**" then connect the USB Cable with the drive and your computer until the **red LED** and **orange LED** light up. You now can release the "**Lock**" button.
2. Enter the existing passcode, press "**Unlock**" to confirm. The **orange LED** will turn off.

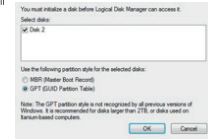

3. Type your new passcode and confirm by pressing "**Unlock**". The new passcode is set now.
4. To unlock your device retype your new passcode and press "**Unlock**".

Note: Passcode must be between 5 and 12 digits long.

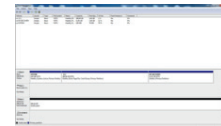

5. Ready to use for Windows

1. Click with the right mouse button on the "My Computer" icon on your desktop.
2. Select the option "Manage".
3. Select the option "Storage" -> "Disk Management".
4. Your system's Disk Management will automatically recognise a drive not being initiated.

Since the drive needs to be unlocked with every system start, choosing MBR is not recommended!

6. Choose the hard drive, which is now "unallocated".

7. Click with the right mouse button on the "unallocated" area and select the option "New Partition". The "New Partition Wizard" opens.
8. The installation wizard will guide you through the formatting process.
9. Tip: The presets of this installation wizard do not necessarily need to be changed. You may just want to change the drives description and choose for a file system.
10. After the installation process has finished the drive should appear again automatically showing the assigned drive letter and name.
