EMERGENCY MEDICAL EQUIPMENT & SUPPLIES

code-red-trauma.co.uk

Manufactured by
RELIANCE MEDICAL
'Leading First Aid'

Are you equipped?

For any business, Health and Safety, Fire and Rescue, and numerous other requirements place serious responsibilities on employers and companies to prepare for potential or risk-assessed hazards.

Innovative quality, at affordable prices?

Providing all the equipment you need to manage situations that demand much more than the contents of a First Aid Kit.

Emergency Essentials.

Designed specifically to help very serious incidents, to essential furniture needed in First Aid Rooms.

Reliance Medical are one of the UK's leading distributors of high quality, innovative and cost effective everyday First Aid Products and Consumables.

Contact us for more information on CodeRed™ products, your local stocklists or if you are interested in becoming a distributor.

CodeRed™ is the new brand name for Relequip.

First Aid Rooms and AEDs feature in HSE Case Study document.

Accompanying the new HSE Health and Safety (First Aid) Regulations and Guidance document (L74 revised), is a new collection of case studies, designed to add context to the guidelines. Eleven different scenarios include:

- Convenience Store • Supermarket
- Nursing Home • Office
- Secondary School • Primary School
- Café • Construction Company
- Trainside Railway Maintenance Co.
- Chemical Processing Plant
- Remote Locations

Each case study creates a detailed scenario including the layout of the site, the number of employees, and the accident history.

For the first time, the updated HSE guidelines include consideration to providing defibrillators in the workplace. In five of the eleven scenarios, the conclusion includes a recommendation that an AED should either certainly be provided, or should be seriously considered.

In seven out of the eleven case studies, the conclusions point to a clear need for a first aid room in the workplace. In the office scenario with eighty employees working on two levels, and a history consistent with most office environments, a first aid room is prescribed.

FIRST AID ROOM ESSENTIALS

Each and every day, factories, workshops, colleges, hotels, restaurants, shops, even peaceful libraries may face a situation where a person under their care, either as an employee or visitor, is placed at risk.

Mostly these incidents may be dealt with by basic First Aid procedures and if necessary, back-up from Medical Professionals from the Emergency Services.

However, all too frequently, it is no longer acceptable to Dial 999 and wait. Action may need to be taken swiftly and without the risk of making a bad situation even worse. This is where the Relequip™ range of emergency products can help.

Whether you need a portable trolley to update the facilities in your First Aid Room, or a state-of-the-art Evacuation Chair designed to safely extricate someone from a fire hazard, you will find these and everything in between on the following pages.

EVACUATION CHAIR TRAINING VIDEO

View the product in action at:
<http://www.relequip.co.uk/video/>

EVACUATION CHAIR INC. BRACKET AND COVER

The HSE and the Fire Safety Regulations make it clear that owners or managers of premises are responsible for evacuation procedure. It is no longer acceptable to dial 999 and wait for the Fire Service. A sick, injured, or any person unable to negotiate stairs independently, quickly and safely are at risk. The Relequip Evacuation Chair features an advanced 'tracked' design, allowing operation by just one person, reducing health and safety concerns during use, eliminating delay and allowing smooth descent of stairs. Colleges, Hotels, Offices, in fact, any multi-level building cannot afford to be without this essential evacuation device.

The evacuation chair can be used on all staircases excluding spiral staircases. They can be used on a staircase with a platform on the condition that there is enough room to turn the chair.

- Complete with cover and wall bracket.
- Lightweight and compact for easy use and storage.
- Adjustable head pad and patient restraint.
- Impervious to bodily fluids.
- Aluminium alloy materials.
- Two rear wheels.
- Easy to clean and maintain.
- 5 year warranty.
- Chair weight: 10kg.
- Maximum load: up to 159kg.

REF	Description	Size	Unit

3044	Evacuation Chair Bracket	One Size	1

TREATMENT COUCH WITH COUCH ROLL HOLDER

Listed by the HSE as a required item for all First Aid Rooms, the Relequip treatment and examination couch is designed to be robust, strong and practical in use. An ideal item in the Workplace, GP Surgery and most medical environments, the couch is simple to maintain, easy to clean, economic and built to last. The integrated couch roll holder is designed to fit all standard 20" width perforated towel rolls. The towel roll itself is positioned to be unobtrusive and space-saving.

- Fixed height.
- Two sections.
- Complete with couch roll holder.
- Adjustable head/back rest, from horizontal to 85°.
- Soft faux leather upholstery.
- Easy to clean and maintain.
- Couch weight: 20.5kg.
- Maximum load: up to 150kg.

REF	Description	Size	Unit
6030	Treatment Couch with Couch Roll Holder	78cmH x 60cmW x 193cmL	1

REST COUCH

For a patient feeling unwell and needing to lie down, the Reliance rest couch has all the durability and practicality of the examination couches. However, at a height 28cm (11") lower, this model is designed more for patient recovery than treatment, and offers them comfort and physical support, pending further action. The lower height also makes it easier for a colleague to sit next to the patient to provide reassurance and care. The HSE stipulates that all workplaces must have facilities to provide for a situation where an individual becomes ill at work. The Reliance rest couch fulfills that need, and is ideal for Schools, Colleges, Hotels and most workplace environments.

- Fixed height.
- Two sections.
- Adjustable head/back rest from horizontal to 85°.
- Soft faux leather covered padding.
- Easy to clean and maintain.
- Couch weight: 19.5kg.
- Maximum load: up to 150kg.

REF	Description	Size	Unit
7550	Rest Couch	50cmH x 60cmW x 193cmL	1

PORTABLE COUCH

Innovation and truly practical design, combine in this portable therapy couch. Whether for in-house use, or mobile practitioners such as Physiotherapists or Masseurs, the Relequip Portable Couch fits the bill. Truly mobile, the couch transforms from a convenient sized carry case weighing less than 20kg, into a full size adult couch. Features include, adjustable height for the benefit of patient and therapist, comfortable padded arm rests, adjustable, supportive head rest and cut out face panel to allow patient comfort and support when face down during back treatment. Simple, strong, portable, and economic, the Relequip Therapy Couch is the perfect solution for taking the treatment to the patient.

- Adjustable heights.
- Complete with carry case.
- Black and powder-coated metal frame.
- Easy to clean.
- Couch weight: 18.5kg.
- Maximum load: up to 159kg.

REF	Description	Size	Unit
7554	Portable Couch	Open with attachments: 88cmH x 96cmW x 216cmL Open without attachments: 88cmH x 66cmW x 188cmL Folded: 16cmH x 70cmW x 95cmL	1

COUCH STEP

With the average height of an examination couch being fixed at approximately 78cm (approx 31"), depending on the condition of the patient and their physical strength or ability, assistance may be required to get them onto the couch in order to be treated. Providing the individual is mobile, the addition of this small step will eliminate this problem, allowing the patient to mount the couch with minimum effort. Frequently seen as a basic item in GP Surgeries, Clinics, Hospitals, or in fact, most places where a treatment couch is located.

- Easy to clean.
- Lightweight step for treatment couch.
- Tubular steel frame with non-slip feet.
- Step weight: 2kg.
- Maximum load: up to 159kg.

REF	Description	Size	Unit
7551	Couch Step	30cmH x 40cmW x 30cmD	1

SURGICAL INSTRUMENT TROLLEY

An HSE recommended item for all First Aid rooms, a mobile instrument, or dressings trolley provides the perfect solution for keeping vital medical supplies readily available at all times. Three generously sized shelves allow you to store larger items such as sharps bins, glove boxes, or large rolls of cotton wool. The top shelf is the ideal height so that nursing staff or first aiders have a clean stable environment on which to work. Each shelf has a three-sided guard rail to prevent items from rolling off, and the steel construction makes surface cleaning and disinfecting simple. The four castors also feature locking pedals to provide stability when in use.

- HSE recommended for all First Aid rooms.
- Three 'lipped' shelves for larger item storage.
- Castored feet with locking pedals.
- Capacity 1-140kg
- Trolley weight: 12.5kg.

REF	Description	Size	Unit
7553	Surgical Instrument Trolley	90cmH x 62cmW x 45cmD	1

MEDICAL SCREEN

Patient privacy is a paramount concern which can be addressed simply and economically with this four-fold portable screen. When not in use it takes up minimum floor space, but when required, opens in seconds to allow an section of a first aid room, GP surgery, clinic, or treatment centre to be screened off. This allows patients the comfort and privacy to remove garments prior to examination or treatment, with discretion.

- Stainless steel frame.
- Removable curtains.
- Simple maneuverability.
- Four-fold curtained design.
- Folds away for neater storage.
- Screen weight: 12.5kg.

COLUMN SCALES

The Relequip Column Scale is built to last and designed to cope with heavy use in any busy medical environment. The eye-level reading is a thoughtful consideration, particularly for patient reassurance. Its duality allows both patient and practitioner to see the reading simultaneously. The cutting-edge design is in keeping with today's clean, uncluttered, minimalist clinical environment. Careful thought has made the functional and basic appearance as attractive and unobtrusive as possible in harmony with modern appearance now familiar in general medical environments.

The low profile footplate is a generous size, providing both patient comfort, ease of use, and safety. Specifically designed with patient security in mind, this benefits both patient and nursing staff during the assessment process. The weighing mechanism has been made simple, and designed to provide optimal use in medical practices coping with the most intense usage.

Unlike many models available on the market, a built-in height measure is not offered as an option, but included as standard. This makes the Reliquip Column Scale exceptional value for money, and the procedure of measuring both height and weight in one simple step, time-saving and convenient.

- Eye-level reading.
- Low-profile footplate.
- Built-in height measurement.

REF	Description	Size	Unit
3052	Column Scales	149cmH x 43cmW x 53cmD	1

PERSONAL SCALES

Based on the traditional and familiar design seen in every Doctors Surgery or Nurses Clinic, Relequip Personal Scales are equally suitable for domestic use. Robustly manufactured for long life, the scales combine a generously sized non-slip base for patient safety, with a large clear analogue dial display with bold, clear, and easy to read numerals. The scales will accurately weigh up to a maximum of 140kg and the sturdy construction is both easy to clean, and designed to take the daily knocks of frequent everyday use.

- Non-slip base.
- Clear, bold, dial display.
- Dual reading: imperial and metric.
- Large dial.
- Non-slip platform.
- Capacity: 1-140kg.

REF	Description	Size	Unit
3051	Personal Scales	43cmH x 29cmW x 6.5cmD	1

STAINLESS STEEL BIN

Safely and hygienically storing clinical waste until ready for disposal is a routine and daily task in every clinical environment, from First Aid Rooms to Hospital and GP Clinics.

The traditional foot pedal and flip-lid design of the steel bin, allows clinical waste to be dropped into the inner bucket without physical contact with the bin. Likewise, when ready to empty, the inner container can be removed in the same way.

The separate removable bucket may be thoroughly cleaned and disinfected. All surface areas and mechanisms are easily accessible and may be wiped over on a daily basis.

- Safely and hygienically store clinical waste ready for disposal.
- Removable inner plastic bucket with handle. 20 litre capacity.
- Easy-clean surface and interior.

REF	Description	Size	Unit
3042	Stainless Steel Bin	45cmH x 30.5cmD	1

STORAGE CABINET

The Relequip Storage Cabinet has been designed to fulfil all your needs for the safe and secure storage of important first aid supplies and equipment.

Two separate and lockable sections allow for ample storage. The lower section is perfect for blankets and other bulky items that need to be kept dry and dust-free, but don't need to be visible.

The upper section however, allows Practitioners, Nurses, First Aiders and Responders to quickly see and identify smaller products that may be needed in an Emergency.

The two adjustable shelves and the twin clear glass panelled doors allow an easily ordered stock of essentials to be visible for instant selection.

Secure vital equipment, provide rapid access, allow instant selection, maintain stock in dry dust-free conditions, and be ready for any emergency.

- Two adjustable shelves.
- Secure lower section including fixed shelf.
- Independently lockable compartments with keys.
- Nett weight empty: 90kg.

REF	Description	Size	Unit
3034	Storage Cabinet	185cmH x 85cmW x 40cmD	1

METAL CABINET

- Ideal first aid room cabinet.
- Secure storage for supplies.
- Suitable for clinical environments.
- Durable stove-enamelled construction.
- Supplied with two keys, wall fixings and identity sticker.

REF	Description	Size	Unit

EXTRICATION BOARD

Spinal Boards in various forms, have remained the gold standard of post-trauma management where damage to the spine or neck is established, or suspected. The product is an essential item for any emergency professional and is invaluable in avoiding further injury by immobilising the patient prior to transit. A standard item on every NHS ambulance, spinal boards also have a wide range of uses in the Workplace, Schools, Swimming Pools, Sports Centres and Funeral Services.

- Hi-Vis orange PE material spinal board.
- Can also be used with head immobiliser.
- X-ray compatible, due to its translucent properties.
- Offers full body immobilisation.
- High-density polyethylene plastic.
- Impervious to bodily fluids.
- Easy to clean.
- Stretcher weight: 5.5kg.
- Maximum load: up to 159kg.

REF	Description	Size	Unit
3030	Extrication Board	5cmH x 46cmW x 184cmL	1

SPINAL BOARD STRAP

- Adjustable single strap.
- Available in orange.
- Easy to clean.

REF	Description	Size	Unit
3040	Spinal Board Strap	One Size	1

TWO-PIECE RESCUE STRETCHER

The Two-Piece Rescue Stretcher incorporates an ingenious design to protect the spine from further damage during rescue. The lightweight stretcher is exceptionally easy to manoeuvre in even the most confined space and its ability to 'scoop' the patient rather than lift them, can seriously help to reduce risk of permanent spinal injury.

Additional refinements make the Rescue Stretcher resistant to extreme temperatures. Its high-density thermally bonded polypropylene finish resists corrosion and is impervious to damage from bodily fluids. Maintenance-free and easily cleaned surfaces, together with the lightweight two-piece design, make this piece of kit invaluable for use by Emergency Services or as a vital tool in any working environment where there is a risk or history of back injuries.

- Firm and lightweight. Twin safety-lock.
- Recessed head section to maintain spinal alignment.
- Adjustable heights.
- Thermally treated polymer maintains a level temperature for patient. Impervious to fluids and easy to clean.
- X-ray compatible. Complete with three straps.
- Stretcher weight: 7kg.
- Maximum load: up to 159kg.

REF	Description	Size	Unit
7516	Two-Piece Rescue Stretcher	Max: 9cmH x 44.5cmW x 210cmL Min: 7cmH x 44.5cmW x 120cmL	1

TWO-PIECE RESCUE STRETCHER

A tried and trusted design, used as a staple item by Emergency Services and Rescue Organisations for many years. Its main function, apart from transporting the injured to safety, is to do so in such a way that protects the spine where an accident is suspected of causing damage.

The stretcher incorporates a frame of hinged panels. In their unlocked position, each panel is capable of being swivelled, (rather like a cellar trapdoor). The stretcher can be manoeuvred in such a way that allows each of these panels or flaps to slide underneath the body. Once in its final position, all the plates are locked into place and the patient can be safely moved. Instead of being lifted onto a traditional stretcher, they have literally been "scooped up"!

One vital feature is the way the stretcher maximises patient immobilisation during transit. Such details can actually make the difference between recovery and permanent spinal damage.

Another important feature of the Two-Piece Scoop is that when locked in place, the panels that form the bed leave a narrow gap that runs the full length of the stretcher. This allows Emergency Staff to carry out Spinal X-Ray without moving the patient.

- For gentle patient manoeuvring without rolling or lifting.
- Open centre allows spinal x-ray without moving patient.
- Lightweight aluminium.
- Adjustable length.
- Easy to clean.
- Complete with three straps.
- Stretcher weight: 8.5kg.
- Maximum load: up to 159kg.

REF	Description	Size	Unit
7515	Two-Piece Rescue Stretcher	Open 6cmH x 44cmW x 190cmL Closed 6cmH x 44cmW x 120cmL	1

BI-FOLD STRETCHER

The Code Red™ stretcher is a duo-fold design, allowing a normally bulky item to require minimum storage space when not in use. The stretcher folds both horizontally and vertically into the compact dimensions shown below. The frame, manufactured from aluminium, is both strong yet lightweight. The stretcher bed is produced from a tough PVA material that is resistant to fluid and is extremely easy to clean.

Once locked open, the frame ensures the patient is kept clear of the ground. A stretcher is considered a basic item in any first aid room, and is listed as a desirable and essential item by the HSE.

- High-strength aluminium alloy frame.
- Waterproof, fireproof, anti-cracking material.
- Complete with fully zipped carry bag and straps.
- Hi-vis orange.
- Easy to clean.
- Stretcher weight: 5.5kg.
- Maximum load: up to 159kg.

REF	Description	Size	Unit
7501	Bi-Fold Stretcher	Open 14cmH x 52cmW x 206cmL Folded 10cmH x 18cmW x 103cmL	1

PATIENT TRANSFER SHEET

Circumstances may require transportation of a patient to a safe location quickly and with minimal effort. Consideration also needs to be given to those helping, as they risk back injury themselves if trying to move the weight of a prone person incorrectly. The Relequip transfer sheet unfolds from a compact storage bag into a large sheet. Depending on their condition, the patient may be gently rolled to one side, allowing the sheet to be placed under them. Capable of carrying a large person, up to ten people can now easily move the individual with the weight evenly distributed between them. Simple, yet indispensable. (Spinal boards should be considered where neck or spinal damage is suspected).

- Compact and light.
- Multiple carry-straps.
- Ten strategically placed handles.
- Easy to clean vinyl material.
- Sheet weight: 1.8kg.
- Maximum load: up to 159kg.

REF	Description	Size	Unit
3050	Patient Transfer Sheet	Open 204cmL x 71cmW Folded 88cmL x 24cmW	1

HEAD IMMOBILISER

Head Immobilizer is simple to use, lightweight and easy to use. Composed of a universal attachment base and two durable head straps, closed-cell foam head blocks, with one set of head and chin straps. The head immobilizer can be used on all standards backboards.

- Unique head/chin strap is designed to conform to patients forehead.
- Large ear holes for monitoring the patients ear canal.
- Minimal interference with X-ray, MRI or CT scan procedures.
- Waterproof vinyl-dipped foam makes it easy to clean.
- Compatible with all flat backboards.
- Bright red, for attention.
- Compatible with spine board and cervical collars.

REF	Description	Size	Unit
