

PRF Mouse Wireless

Sleek design and luxurious look.

The PRF Mouse Wireless is an ergonomic vertical mouse. The angle of the mouse ensures the correct arm and wrist position.

The shape of the mouse ensures the palm of the hand makes contact with the mouse correctly. This mouse is held in a handshake position.

The 'handshake' grip of a vertical mouse ensures the wrist and lower arm twist less (Schmid et al., 2015). This means less muscle activity in the lower arm compared to a standard mouse (Quemelo & Vieira, 2013).

Research shows that use of a vertical mouse facilitates quicker recovery from arm, wrist and hand injuries (Aarås et al., 2001).

The latest ergonomic mouse from BakkerElkhuizen

You use your mouse a great deal during the day. With a traditional mouse, your wrists twist, your arms cramp up and your shoulders are strained. There are different kinds of ergonomic mice on the market to prevent this. A vertical mouse is a mouse that forces the hand into a handshake position. That puts less strain on your wrist and lower arm. A good mouse prevents injuries. Using the wrong mouse can cause pain and discomfort in the shoulders, lower arms and hands. A vertical mouse mostly prevents these problems.

Benefits of the PRF Mouse Wireless

Ergonomic

Because this is a vertical mouse, arm and wrist position are improved considerably compared to a 'traditional mouse'.

Unique

You grow accustomed to this mouse very quickly.

Wireless

The PRF Mouse has a wireless range of up to 20 metres.

Design

Its black colour gives this mouse a sleek appearance that looks good in the workplace.

Simple

It is easy to adjust the cursor speed of the PRF Mouse to your desired speed.

Convenient

You can simply store the USB receiver inside the mouse to make sure it will not get lost.

Knowledge Center

Computer mice are still the most-used accessory on people's desks. Since different people need different types of mice, we present a practical overview below.

In many cases, the first thing that comes to mind when discussing ergonomics for computer users is the mouse we use. This makes...
