

Tilde Air Premium

"The Tilde Air Premium is a headset intended for workers in open workspaces and offices.

This allows you to adapt ambient sounds in an adaptable manner and to communicate sound-free and / or to work concentrated.

Headphones with active noise canceling are headphones that reduce unwanted ambient noise. This differs from passive headphones, which, when they reduce ambient noise at all, use techniques such as sound isolation.

To cancel the lower frequencies of noise, noise-canceling headphones use active noise canceling. They include a microphone that measures the ambient noise, generates a waveform that is exactly the negative of the ambient noise and mixes it with any audio signal the listener desires. Noise Cancelling Headphones specify the amount of noise they can cancel in terms of decibels.

Active noise-cancelling for open workspaces

Perfect examples of places where Active Noise Canceling (ANC) headphones can be used are open workspaces. Productivity increases by staying focused and not distracted by colleagues

Would you like to be able to fully concentrate on a quiet place? Push the slider down to gradually reduce background noise and eliminate distractions. The white light indicates that you do not want to be disturbed.

Benefits Tilde Air Premium

Suppress noise

Tilde Air has an active noise reduction that is adjustable from 0 to -30dB. Using a simple slider, you can gradually reduce background noise and eliminate distractions.

Collaborate

These selective headphones with active noise canceling provide clear communication in loud places and efficiently reduce background noise.

Volume

The product is ideal in open offices. In addition to being able to filter out ambient noise, the Tilde Air also ensures that your own volume drops significantly. The technology in this product ensures that you immediately notice how loud you speak.

Wearing comfort

The Tilde Air is one of the most lightweight headphones. The product weighs only 40 grams! In addition, the neckband is very flexible, you hardly notice that you have the Tilde Air.

Sound

The active noise canceling contains 4 microphones and the 'voice first' also contains 4 microphones. If you want to listen to music, this is possible in High Definition. The Tilde Air is easy to connect via Bluetooth 4.2 and is also compatible with Siri and Google Assistant.

Lifespan

The Tilde Air Premium batteries, when fully charged, last 8 to 12 hours. Charging is easy with the micro-USB cable. In 30 minutes (lunch break) it is charged for 50%. If you want to fully charge it, it only takes 2 hours.
