Dual Monitor USB-C Dock - 60W Power Delivery - 4K

Product ID: DKWG30DPHPDU

This USB-C dock lets you transform your Windows 10 laptop into a full-sized workstation, connecting two external monitors (DisplayPort and HDMI®) or single 4K monitor.

Power your dock and laptop with one adapter

With 60W Power Delivery, the docking station simultaneously powers and charges your laptop, while powering all devices connected to your laptop and the dock. A single adapter powers your dock and laptop.

Dual-monitor video output

Create a dual-monitor setup by connecting:

- 1x HDMI display and 1x DisplayPort display at 1920 x 1200p @ 60Hz

The USB-C dock also lets you connect to a single high-resolution 4K monitor, with:

- 1x HDMI display or 1x DisplayPort display at 3840 x 2160p @ 30Hz

Ample connections

The USB-C dock has four USB 3.0 ports (2x USB 3.0 and 2x USB 2.0 ports including a front-accessible fast charge-and-sync port) plus Gigabit Ethernet (with PXE Boot support) and headset connections.

Versatile setup

The dock's small footprint fits into any workspace. It sits solidly in the supplied stand, or you can position it horizontally.

Wireless docking option, where supported

The dock also supports WiGig® if your laptop supports it. With wireless docking, you dock and undock your laptop without having to connect and disconnect a cable, saving time. Note: USB Power Delivery is only supported when connected through USB-C, and is not supported with WiGig. For WiGig, the dock must be positioned vertically.

The DKWG30DPHPDU is backed by a StarTech.com 3-year warranty and free lifetime technical support

Applications

- Power and charge your USB-C equipped laptop, using only the dock's power adapter (through USB-C only)
- Deploy in offices and business settings or create hot desk workstation
- An essential accessory for the latest USB-C equipped laptops such as the HP® Spectre x360, Dell XPS™ 15, 13, or 12, Dell Latitude™ laptops and 2-in-1s
- Also supports laptops with WiGig wireless docking, ideal for those who travel to and from the office

Features

- Power and charge your laptop with support for USB Power Delivery (up to 60 watts) when connected through USB-C
- Supports dual monitors with 1920 x 1200p @ 60Hz resolution on each display (DisplayPort and HDMI), or a single 4K monitor 3840 x 2160p @ 30Hz
- Connect your peripherals with 4x USB-A ports (2x USB 3.0, 2x USB 2.0) including a front-panel fast-charge and sync port (supports USB Battery Charging Specification 1.2)
- Transform your USB-C enabled Windows 10 laptop into a full-sized workstation
- Compact design (8" x 4.8") sits either upright (in solid stand) or horizontal
- Gigabit Ethernet RJ45 port (with PXE Boot support) and Wake-on-LAN (WOL), 3.5 mm headset port
- Thunderbolt™ 3 port compatible (the dock connects to a Thunderbolt 3 port at 5Gbps and will support USB Power Delivery)
- Supports WiGig wireless docking

Special Notes / Requirements	Note	The dock can connect to a host laptop's USB-C port even if it doesn't support USB Power Delivery 2.0 and DP alt mode. However, without support for these two protocols, the dock will not pass power through to your host laptop or support video output.
		The dock's DisplayPort port only supports active DisplayPort video adapters.
		USB 3.0 is also known as USB 3.1 Gen 1; this connectivity standard offers speeds up to 5Gbps. USB 3.1 Gen 2 offers speeds up to 10Gbps.
		A 4K-capable display is required to achieve 4K x 2K resolution (4K is also known as 4K x 2K).
		Video output capabilities are dependent on the video card and hardware specifications of the host laptop it's connected to. Certain video cards have limited video support, and some monitors will also limit the available resolution.
		When connected to your host laptop through WiGig the dock only supports 2-channel audio (5 and 7-channel audio is not supported).
		HDCP content is not supported when connected in WiGig mode.
		USB Power Delivery is only supported when connected through USB-C, and is not supported when connected through WiGig.
		For WiGig mode, the dock must be positioned vertically.
	System and Cable Requirements	A USB-C equipped host laptop (the host USB-C port must support USB Power Delivery 2.0 in order to power and charge your laptop, it must also support DP alt mode to enable video output) or a WiGig (IEEE 802.11ad) equipped host laptop.
