## Armoured Pouch Carrier

### CODE:

- 40353 A4 – Trade Pack: 1
- 40354 A3 – Trade Pack: 1
- 40355 A4 – Trade Pack: 5
- 40356 A3 – Trade Pack: 5

### Protect your laminator – prevent pouch jams

- Superfine PTFE-coated woven glass fibre
- Thermally efficient for perfect heat transfer
- Essential when laminating cut-outs
- Durable and long-lasting
- Supplied in a robust storage tube
- Available for both A4 and A3 pouches

The biggest single cause of jammed laminators is incompletely filled pouches – when cut-outs or irregular shapes are being laminated. Pouches need the support of paper across their entire area. If they do not have this support, they can droop and become entangled in the laminator mechanism.

Swordfish Armoured Pouch Carriers provide the support that incompletely filled pouches need – without the need to adjust the laminator's temperature control.
