

PORTABLE SSD

HIGH-PERFORMANCE EXTERNAL SSD
Data Sheet

Have the Luxury of Less Time.

60 seconds or less—how might you spend the rest of your day if that's all it takes to back up high-res photos and footage? Would you capture more? Edit more? Create more? With speeds up to 540MB/s, compatibility across Mac, Windows, USB 3.0, and USB-C, huge capacity up to 2TB, and a slim, diamond-cut design for life on the go, LaCie® Portable SSD respects your precious time. By never stealing it.

Make Moves in a Flash.

Edit loads of 4K compressed video. Traverse multiple Adobe® applications at once. Mix and master. Whatever you create, do it confidently with some of the quickest file transfers possible.

- With up to 540MB/s sequential read/write speeds, you can edit directly from your drive.
- Transfer one hour of footage in less than one minute with flash-accelerated speed.

Compatible Today. And Tomorrow.

USB-C is here to stay and LaCie Portable SSD embraces that with a reversible USB-C cable—meaning there's no wrong way to plug in. For legacy devices, we hook you up with a USB 3.0 to USB-C cable.¹

External SSD. Inherent Utility.

If speed were everything, we would have stopped there. But we know that capacity matters to you. And so does form factor. That's why every gigabyte of space, every curve and angle, fuses together to form a tool that's minimalist in style, overflowing in potential.

- 2TB fits 65hrs of 4K 30fps compressed footage, 20K RAW images, or 200K JPEGs.
- Drop resistance up to 2 meters helps protect files during transport.²
- Lighter than a deck of cards. Slim enough to fit in your pocket.

Customize Your Backup

Life today equals many devices and busy schedules. And in the midst of it all, you need to secure your files. LaCie Toolkit makes it easy.

- Back up on demand with one click.
- Schedule daily, weekly, or monthly backups.
- Sync files and projects across multiple devices.

¹ For optimal performance, connect to USB 3.1 Gen2 or Thunderbolt™ 3 computers.

² In nonoperating mode
