

TeraStation™ 5010

Network Attached Storage

NAS with native
10GbE connectivity.

Scalable high performance network storage for businesses.

Buffalo's TeraStation™ 5010 series has been built for small and medium sized businesses seeking an easy and cost-effective 10GbE platform. The TS5010 is a network attached storage (NAS) solution with iSCSI protocol designed to move SMB data at enterprise level speeds and eliminate the bottlenecks that can occur on slower networks.

Thanks to its powerful hardware the TS5010 series can run multiple concurrent services seamlessly with minimal performance degradation, and is ideal for organizations looking to add an affordable virtualized storage to their business network. Branch offices no longer need full-scale server infrastructure for simple tasks such as file sharing and backup. Cloud backup is also supported with Microsoft Azure and OneDrive, Dropbox/Dropbox Business and Amazon S3.

In combination with Buffalo's 10GbE business switches the quad core processor featuring TS5010 reaches faster than ever data transfer speeds. The series comes populated with NAS- or enterprise nearline (TS51210RH) grade HDD and is available in 2-, 4- or 8-bay desktop and 4- or 12-bay rackmount configurations.

The 4-, 8- and 12-bay versions come fully populated or partially populated, thus giving companies the flexibility to start with a smaller initial investment and increase the total capacity when the need arises in the future. The 2-bay TS5210DF is equipped with SSDs and therefore highly shock-/vibration-proof and extremely fast.

Features and Benefits

- High-speed native 10GbE connection (1 or 2 (TS51210RH only) 10GbE ports)
- 2.5/5Gbps compatible, compliant with NBASE-T (IEEE 802.3bz) standard
- Powered by the high performance Annapurna Labs® Quad-Core processor with 4GB/8GB (TS51210RH) DDR3 ECC RAM
- Available in 2-bay, 4-bay and 8-bay desktop models or 4-bay and 12-bay rackmount
- Simultaneous NAS and iSCSI target functionality
- Advanced NTFS Permissions (Windows ACL)
- VMware ready
- Rapid RAID mode change
- RAID Mode Manager
- TRIM Command for increased SSD life time (TS5210DF)
- AES 256bit data encryption
- Boot Authentication ensures the device is only accessible on authorized networks
- Integrated cloud backup with Microsoft Azure and OneDrive, Dropbox and Amazon S3
- Remote access through WebAccess
- NovaBACKUP® backup software (11 licences for NovaBACKUP® Buffalo Edition)
- Duplex System Firmware Boot
- Active Directory (up to 10.000 supported users/groups imported from the domain)
- 3 year standard warranty (5 years for TS51210RH) including 24-hour HDD replacement; warranty extensions available separately (not for TS51210RH)

About BUFFALO

BUFFALO is a leading global provider of award-winning storage, networking and multimedia solutions for the home and small business environments as well as for system builders and integrators. With more than four decades of networking and computer peripheral experience, BUFFALO has proven its commitment to delivering innovative solutions that have put the company at the forefront of infrastructure technology.
