

Laptop Combination Lock

Product ID: LTLOCK

This laptop lock gives you an easy and effective way to secure your laptop to a sturdy object and keep it safe from theft. With this 4-digit combination lock, you can be confident your laptop and valuable data are well protected.

You can ensure that your laptop, monitor, docking station or other electronic device will be anchored safely to your workspace in just a few simple steps with this keyless 4-digit combination lock. It effortlessly latches directly into a laptop or other device equipped with the industry standard Kensington K-Slot security-lock slot, providing dependable theft prevention in a wide range of retail, commercial, and institutional environments.

Featuring a vinyl-coated steel cable (6 mm diameter), this laptop lock is designed for effective theft prevention.

The flexible vinyl-coated steel cable bends easily to loop around a stationery post or object, protecting your laptop or docking station against theft.

The TAA compliant LTLOCK is backed by a StarTech.com 2-year warranty and free lifetime technical support.

Note: Please exercise caution when handling the cable; pushing the cable itself into the lock head is part of the process to change the combination. This being done accidentally could result in the lock having to be manually removed. Please refer to the user's manual for instructions on how to properly use the lock, as well as setting and resetting the combination.

Certifications, Reports and Compatibility

Applications

- An essential anti-theft tool for professionals working in high-security environments
- Secure your laptop, monitor, docking station or other electronic device when working in low supervision areas

- Perfect for theft prevention in retail stores and commercial enterprises, office buildings, libraries and computer labs, educational facilities and government offices
- Protects your laptop from theft when travelling or working remotely

Features

- Combination lock with 1.8 m (6 ft.) cable protects your laptop against theft
- Secure your laptop conveniently without using a key
- Resettable and easy-to-use 4-digit combination lock
- Vinyl-coated steel (6 mm diameter) ensures cable strength and durability
- Works with laptops, monitors, printers, docks and other devices with a built-in Kensington K-slot security slot
- Flexible cable bends easily to loop around a stationary post or object
- Easily reset combination by pushing the cable into the lock head (see manual for details). Ensure you are grabbing the lock head and not the cable as this may cause an accidental combination change
