How to Use

The included 4-pin Y-Cable can be used on systems with only one available 4-pin PWM Fan Header to connect two different system fans. Connect the 4-pin female connector on the cable to the Fan Header on the system board, then connect a 4-pin PWM-enabled fan to the 4-pin male connector (black). A 3-pin or 4-pin fan can be connected to the 3-pin connector (white). The speed of both fans will be controlled simultaneously, based on the PWM signal from the 4-pin connector (black).
