

**Advanced
technology cleaning**

**Aftercare for all your tech
at home, work and on the move**

Welcome to the world of advanced technology cleaning

AF International has been a leading manufacturer of specialist cleaning products for the IT and Office Products Industry for over 40 years.

Our heritage and values

You can trace AF's roots back over 40 years to the birth of Automation Facilities and the manufacture of effective specialist office cleaning products. Today, AF International remains a family owned business but is a global leader of specialist PC, workstation, and tech cleaning products, with manufacturing on three continents. From our Head Office in Ashby de la Zouch, Leicestershire, we export globally and have a growing presence in over 55 countries around the world.

We pride ourselves in offering a high quality product choice backed by thorough research and development to meet the needs of on-going market trends.

Trusted and recommended

AF International is a brand to be trusted, both in terms of product and supply chain. Offering a well-established strong brand image, we thrive on providing first-class product choice to the global market. Our unrivalled, very personal customer service also extends to every corner of the world. You can rely on our helpful, fully trained staff to be up to speed with the latest technological developments and cleaning solutions.

AF's new packaging incorporates easily identifiable colours and styles; the Core Range in traditional blue and silver, the Capsule Whiteboard Range in brilliant white and the Specialist Cleaning Range in gunmetal grey livery. All AF International products are manufactured at our BS EN ISO 9001:2008; ISO 14001 and OHAS 18001 accredited factories.

Cleaning with confidence

Our comprehensive Core Range of cleaning products include, spraydusters, screen cleaners, surface cleaners, cloths and wipes, maintenance products and kits, suitable for cleaning countless products in many different environments. Exceptional results can be expected from these products specifically formulated for office and home workstation freshness.

Our Capsule Whiteboard Range incorporates all elements required to ensure that whiteboards are well maintained and clean. In addition to our more traditional ranges, we have progressed to support the professional engineer with our range of Specialist Cleaning. This range includes an innovative collection of ATM/POS cleaning kits and PPE sector maintenance in the form of hearing defender cleaners and safety glasses wipes packed in sachets and tubs. To view our capsule and specialist ranges in full please see our additional two brochures containing all information and products required for whiteboard and specialist cleaning maintenance.

The AF product range has been carefully developed by our Research and Development Team to provide the very best in cleaning solutions. We are committed to providing a strong selection of products that make cleaning maintenance easy and convenient for everyone. A regular cleaning regime for specific equipment can prolong sustainability, ultimately lowering costs.

The power to deliver on a global scale

AF International has a strategic network of distributors throughout the world; our disciplined network can offer all our customers genuine security of supply. This robust supply chain ensures that we can always respond promptly and deliver a bespoke service, even when the unexpected happens.

Manufacturing on three continents also allows AF International a strong supply chain as we can ensure complete continuity of supply. We understand the importance of relationships and the ability to supply goods on time. Our customers are very important to us, but your customers are also very important to us too.

Our social responsibility

AF International recognises the importance of Corporate Social Responsibility and is proud to work with a number of charities around the world.

Barnardo's in the UK are AF's chosen charity. Established for 150 years they work with over 100,000 children, young people and their families running 960 vital services across the UK including counselling for children who have been abused, fostering and adoption services, and support for families who have a disabled child.

Deutsches Kinderhilfswerk (Children's charity of Germany) fights for the rights of children tackling poverty to give them equal opportunities through a variety of activities in Germany.

The National Forest, located in the heart of Leicestershire, (local to AF's UK Headquarters), is a charity and non-profit institution designed to encourage forest related activities and tree plantation to offset and reduce carbon emissions.

AF in the environment

The world is changing and AF International is resolutely committed to an ongoing sustainability programme, which means we aim to reduce, reuse, rethink and recycle wherever possible.

Our commitment to a more sustainable world

AF International are committed to promoting environmentally friendly products and services in line with on-going changes in the world. Working across our organisation. We aim to encourage recycling methods to our employees and the businesses that we work with to promote a greener way of living and industry. AF is currently working towards a target of zero waste to landfill as part of an ongoing commitment to a greener future.

Formulated to be greener

As environmental concerns heighten, continued investment in Research and Development allows AF to remain at the forefront of cleaning technology, frequently exceeding customer expectations. Our in-house Technical Support Team regularly review our cleaning concentrates and the chemicals used therein with a clear objective: could this formulation be greener? AF is a responsible manufacturer with a conscience and is steadfast in its commitment to greener solutions for the future.

Sustainable packaging

Commensurate with our research and development programme for new products, packaging is key in terms of aesthetics, practicality and recyclability. However, a 'sustainable packaging' approach is also taken when reviewing existing products. For example, where possible, all AF aerosols have now moved to tin plate steel as less energy is required to manufacture and the scrap steel from these cans can be used in new steel production.

Reducing CO₂ in aerosols

AF spraydusters are incredibly popular, however the changing F-Gas Legislation relating to HFO gases used in some spraydusters has been increasingly restrictive over the past few years. AF International commenced work on the world's first active carbon sprayduster (Sprayduster Zero™) prior to these changes and as a consequence has already launched an environmentally friendly solution in advance of the ban on using HFO gases in spraydusters.

Sprayduster ZERO™

Our ground-breaking active carbon sprayduster.

Give your brand the power of AF with 'Private Label'

As Europe's leading provider of office and specialist cleaning products we understand the importance of brand image and product choice.

Our research and expertise is something to be relied upon with strong effective results worldwide.

We know how significant brand image is and we can work with you on any scale to create products, packaging and distribution facilities at excellent value.

As AF is an established, powerful brand we recognise the significance of protecting your brand and adding value in the process.

Adding the power to your pocket

- High quality product choice
- Innovative product's through extensive research and development
- Educational, research and consumer marketing
- Designated account manager to work in partnership
- Expertise of office, specialist and technology cleaning supplies

AF home and office

The definition of an office has evolved in recent years and AF International have developed a Core Range of products to meet all of the needs of many different office working environments.

We are living in a world where an office comes in all shapes and sizes; it could be a call centre, medical establishment or a home office. The changing nature of the office environment has prompted AF International to develop cleaning products for multiple uses.

A wide selection of categories highlights the range of exceptional products on offer. Including Spraydusters, Screen cleaning, Surface cleaning, Cleaning kits, Cloths and Maintenance – the Core Range from AF International.

How dirty is your keyboard?

Try Ultraclene - we guarantee that you will be shocked!

Ultraclene

What is lurking in your keyboard? AF Ultraclene kit tackles every inch to find out. It includes a wet wipe to remove all unwanted dirt and grime to be used with the clever cleaning tool, to reach those difficult areas. Finish cleaning by using the dry wipe to leave a fresh clean finish at your fingertips.

ULT010

Hot Desk Kit

Brand new to the AF Core Range is the Hot Desk Kit; a cute drawstring bag of essential cleaning products for hot desking requirements. Quickly freshen up screens, phones and headsets with these essential hot desking products, perfect for on the move. In office environments hot desking is becoming increasingly popular and this handy little kit cleans workstations in super quick time.

HDK000

Smart Wipe

The new AF Smart Wipe will revolutionise the world of screen cleaning with convenience at your fingertips. Daily grease and fingerprints on smartphones, screens, tablets and even spectacles is inevitable, but there is a solution. This box of 10 individual dry wipe sachets are super strong, washable and will leave a 'smear free' sparkling finish to any screen.

SMARTWIPE10

Spraydusters

AF International's core range of spraydusters are all non-flammable and have been designed to combat dust and debris from inaccessible or hard to reach areas of equipment. There are a number of different strengths available and a combination of invertible/non-invertible products.

The complete range of AF spraydusters is also fully compliant with the changing F-gas regulations effective from 1st January 2018. The range also includes an innovative active carbon duster called Sprayduster Zero™ with a GWP of just 1.

Sprayduster ZERO™

Award winning and a world first. Sprayduster ZERO™ is non-flammable, invertible, has a GWP (global warming potential) of just one, three different 'blast' strengths and zero odour. Fully Compliant with the new F-Gas legislation. HFC free.

SDZ420D

Sprayduster - non-invertible

This powerful non-invertible HFC free spray duster effectively removes dust and dirt from keyboards, printers, computers and more. Simple yet effective.

SDU400D

SDU100

Sprayduster - invertible

HFC free Invertible and non-flammable sprayduster ideal for blasting dust and debris from keyboards, computers, printers and many more inaccessible areas. Can be used at any angle for the delicate areas of optical and electrical equipment.

SDU125D

SDU200D

Superduster - invertible

AF's highest powered HFC free sprayduster benefits from being non-flammable, odourless and invertible. Ideal for cleaning dust and debris from inaccessible and hard to reach areas.

SPDI200

Superduster - non-invertible

This high powered HFC free sprayduster is non-flammable and odourless and works exceptionally well on keyboards and printers.

SPD300

Screen cleaning range

AF International's range of screen cleaning products have been specifically developed to allow quick cleaning and ensure a sparkling, smear free finish. From wipes and sachets to our universal screen cleaning products, AF has a solution for every screen.

Tech-Wipes

Handy pack of 25 impregnated wipes to keep your tech clean and smear free. Ideal for when on the move. Packaged in an open display box ideal for retail environments.

MTW025P
