UHD7510  
UHD8610

4K Ultra High Definition  
Interactive Flat Panel Displays

## UHD6510, UHD7510 & UHD8610:

Available in a range of sizes to suit any environment, our interactive screens feature crystal clear resolution and highly responsive touch screen technology.

## Engage, Involve, Inspire

**The smart range of Hitachi Interactive Flat Panel Displays incorporate a host of clever features like 10 person multi-touch and have been designed for a variety of uses from boardrooms, classrooms, lecture theatres, foyers, and consultation rooms.**

The bright LED anti-glare screen, wide viewing angle and two powerful 15W speakers bring presentations to life, and the clean contemporary slim white bezel frame blends perfectly into most environments, making sure that nothing distracts from the message on the screen.

Hitachi has it all covered. From the 65" size for huddle meetings through to the largest 86" interactive display for demanding mission-critical applications.

With the very latest Windows 10 capability you can forget time-consuming set-ups and the option of a built-in PC means you don't need any type of external source at all. All you need to do is walk in, turn it on and inspire.

## 65, 75 and 86" Interactive Flat Panel Displays

**HITACHI**  
Inspire the Next

These smart new Hitachi Interactive Flat Panel Displays have been designed for a variety of uses from boardrooms, classrooms, lecture theatres, foyers and consultation rooms.

Exhibitions

Lecture & Conference Halls

Foyers

Office Meeting Rooms

Consultation Rooms

Galleries

Educational Facilities

These images are representative of the situations and locations that the UHD8610, UHD7510 and UHD6510 could be used in.

## Interactivity

### Multi-touch Capability for up to Ten People

Hitachi's Interactive Flat Panel Displays turn every presentation into an involving experience. Instead of passively viewing, up to 10 people can interact with the screen at the same time, using the supplied stylus pen or their fingers.

### Anti-glare Screen

Hitachi's Interactive Flat Panel Displays achieve 100% light transmission for outstanding colour, clarity and accuracy – even in direct sunlight.

### Useful Features

This range has a host of useful features like built in scheduler, panel lock, advanced colour settings, auto signal turn on and movable Remote Control receiver.

## Design

### Black or White Bezel Frame\*

You can choose which colour model you want depending on your environment. These model are available in Black or White. (\*Depending on your region).

### Ensure Best Picture Quality

Ultra HD Resolution achieves the best Image. No distortion and outstanding quality with a wide viewing angle means the user and audience are not compromised in any way. The outstanding resolution of UHD vividly delivers high-quality images or video content.

### Free Wall Mounting Bracket Included

The supplied free bracket allows the units to be safely mounted to most walls without incurring additional expense. As the bracket is a standard VESA mount it's also compatible with the majority of third party trolley manufacturers allowing the unit to be easily moved from room to room.

## Connectivity

### Connectivity

These Interactive Flat Panels have a number of connectivity solutions: 2 x HDMI, Display Port In & Out, VGA, Analogue and two built in USB ports. Also RS232 control is available via serial port or wired network. Miracast can be used to mirror your contents on the screen with a compatible device.

*\*Miracast is not available for UHD8610*

### Built-in PC

A built-in integrated PC (OPS) means the panel is ready for use straight away. This OPS can be connected to a network (wired or wireless), has four USB ports and VGA output to a second display.

*Depending on your region You can choose with or without built-in PC at time of purchase.*

### External Devices

All the range is fully compatible to connect your external devices via HDMI, Display Port or analogue. It can also be used with a Macintosh device. All these ports will mirror seamlessly your content onto the screen using the micro USB port for interactivity.

## Safety & Maintenance

### Long-lasting Performance

The Interactive Flat Panel Displays really highlights Hitachi's reputation for quality and reliability. Its components have been designed and tested for longevity ensuring low running costs and budget savings throughout its lifetime.

### Toughened Glass

With 4mm anti-glare glass technology maximising the usability and visibility of the screen in bright light conditions, it also provides added safety using toughened glass.

### Service and Support

Your Hitachi interactive display has been manufactured to the highest standards of care, attention and quality. However if something was to go wrong we offer an on site service\* giving you peace of mind in the unlikely event if anything was to go wrong.

*\*Depending on your region*
