EFFICIENT PLAN FILING SOLUTIONS

HANG-A-PLAN

PLAN FILING SYSTEM

Hang-A-Plan filing systems allow large amounts of plans and drawings to be well organized and easily accessed using only a minimal amount of storage space.

Hang-A-Plan systems offer a range of Australian made mobile trolleys, wall racks and plan binders to accommodate A0, B1, A1, A2, A3 and A4 size plans and drawings.

There are many trolley and binder options to suite different budgets and user requirements.

Benefits and Advantages

- Save up to 80% on floor space
- Save time with faster filing & retrieval
- Patented QUICKFILE binder system
- Easy access to all drawings
- Quality construction
- Made in Australia
- 10 Year guarantee on binders

Quick and Easy Use

Hang-A-Plan Front Loader Trolleys permit quick and easy unobstructed access to all drawings. Patented QUICKFILE plan binders have innovative improvements to allow plans and drawings to be filed or retrieved up to twice as fast when compared to other plan binders.

Saves Time and Money

Compared to a traditional drawer system, the Hang-A-Plan vertical filing system saves up to 80% on floor space and cuts filing and retrieval time by over 75%.

10 Year Guarantee

Every binder is hand assembled and tested to meet strict quality standards. If any components prove defective under normal use, they will be replaced free of charge.

Australian Made

Hang-A-Plan products are designed and manufactured in Melbourne, Australia.

Reviews - QUICKFILE

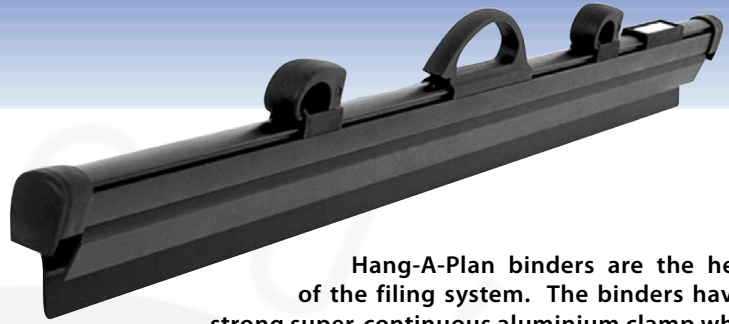

Judge's comments from Australian Design Awards 2005:

"This is most definitely an improvement upon existing options / products"

"The mechanism is good and an excellent way to store documents. An improved and functional system, the design is robust."

"The appropriateness is quite well thought out as the need to store large format sheets with quick access and mobility is still very real in many design studios and architecture offices."

Plan Binders

Hang-A-Plan binders are the heart of the filing system. The binders have a strong super-continuous aluminium clamp which holds the plans securely and firmly together for storage on a Trolley or Wall Rack. Hang-A-Plan binders feature a 3-piece clamp design for a strong and even grip and a centred handle for better load balance and carry comfort.

Choose between the time saving QUICKFILE plan binder, or the NEW economical GENERAL plan binder.

QUICKFILE Binders

Save time and money by taking the hassles out of filing. The patented QUICKFILE binder allows you to remove and replace plans up to twice as fast thanks to the alignment extension and quick release cam levers.

Alignment Extension

One side of the clamp is extended. This improvement allows plans to be placed on the extension and easily guided into the clamp.

Quick Click Filing

Cut your filing times in half. The unique Quickfile cam levers open and close the clamp with a simple "click". The lever base locks the lever in the closed position. The levers twist for easy clamp adjustment.

Longer Length Clamp

The QUICKFILE binder is designed to hold USA sizes: 36", 30" & 24" as well as the DIN A0, B1 & A1 sheets.

Indexing

The index label holder makes it easy to add and replace reference labels on each binder.

GENERAL Binders

The new economical GENERAL binder has a strong 3-part anodised aluminium clamp with wing nuts, a comfortable centred carry handle and self-adhesive index labels. Available in A1 or A0 size.

Racks & Trolleys

A1 Premium Front Loader Trolley (D055)
with Systems Shelf (D056) &
QUICKFILE Clamps (D200B)

General Front Loader
Trolley (D060) &
GENERAL Clamps (D102A)

Hang-A-Plan Front Loader trolleys and wall racks provide clear and easy access to all drawings. Binders may be pivoted and removed from the front of the trolley without any obstruction. The trolleys are made from high strength steel frames finished in a satin black scratch resistant powder coat. The top channel, used for suspending binders, features an extra hard wearing nylon coated finish.

Premium Trolley

The Premium trolley has a 25 binder capacity and features a fifth wheel for improved mobility and increased load capacity. Available in two sizes; a large trolley for up to A0 size binders and a smaller trolley for up to A1 size binders. A separate steel 'Systems Shelf' is available for premium trolleys. This add-on shelf provides extra storage space above the trolley for associated files.

General Trolley

The General Trolley is a lower cost option and has a 20 binder capacity. Available in A1 or A0 Size.

Front Loader Wall Rack
WR1200 (D065)

Wall Rack 1200

The Wall Rack 1200 has a 10 binder capacity and is height adjustable to suit plans of any length. The double rack design allows binders to be inserted on the left or right side. The Wall Rack has an extra hard wearing nylon coated finish and will hold all Binder sizes.

Self Assemble

For convenience of on-site transport, all Hang-A-Plan racking systems are supplied knocked down for self assembly with the aid of the one simple tool provided.

CAD Mobile Project file

The space saving CAD Mobile Project File efficiently stores A2, A3 and A4 size printouts. The trolley is designed to roll under a desk or workstation for quick access and storage. Organise drawings on up to 16 clamps with index tabs. The trolley comes supplied with 8 clamps.

Quick Access Clamps

The unique CAD clamps cut filing and retrieval time in half. Each high quality aluminium clamp uses patented QUICKFILE technology enabling the clamp to be opened and closed with the "click" of a single lever.

The clamps have a tough black powder coated finish and are supplied with index holders and labels. Extra clamps can be purchased in sets of 4 (D011)

Space Saver Trolley

The trolley is made from strong powder coated steel frames and is designed to fit under desks. The trolley comes flat packed and is very simple to assemble with a single tool that is provided.

Capacity

Each CAD clamp will hold A2 - A4 size sheets and have a 60 sheet capacity. The trolley will hold upto 960 sheets on 16 clamps.
