**SECTION 2 HAZARDS IDENTIFICATION**

---

**Emergency Overview:** This product is not classified as dangerous according to the latest adaptations of EU Directive 1999/45/EC or 67/548/EEC.  
Appearance and odor: Fine blue powder, slight plastic odor.**US Regulatory Status:** Hazardous under OSHA HCS.**US Label Elements:****Signal Word:** Not required**Hazard Warning:** Not required**Safety Advice:** Not required**Hazardous Component:** Titanium dioxide is listed as IARC Group 2B, but its labeling is not required by OSHA HCS.**EU Classification:** Not classified as dangerous.**EU Label Elements:****Symbol & Indication:** Not required**R-Phrase:** Not required**S-Phrase:** Not required**Dangerous Component:** Not required**Applicable Label Elements in accordance with Annex V to 1999/45/EC:** Not applicable**Authorisation # under (EC) No 1907/2006:** None

**Other Hazards:** Fine and explosion hazard:  
This product, like most organic powders, can cause a dust explosion if particles form thick clouds.

### SECTION 4 FIRST AID MEASURES

**First Aid Measures:**

**Inhalation:** Provide fresh air immediately. If symptoms occur, seek medical advice.

**Ingestion:** Clean mouth out with water. Drink several glasses of water. If sickness develops, seek medical advice.

**Skin:** Wash out particles with plenty of water and soap. If irritation develops, seek medical advice.

**Eye:** Do not rub eyes. Immediately rinse with plenty of clean running water until particles are washed out. If irritation persists, seek medical advice.

**Most Important Symptoms and Effects, both Acute and Delayed:**

**Inhalation:** Exposure to excessive amounts of dust may cause physical irritation to respiratory tract.

**Ingestion:** Practically non-toxic. Ingestion is a minor route of entry for intended use of this product.

**Skin :** May be non-irritant.

---

<b>Eye:</b>	May be non-irritant.
<b>Chronic Effects:</b>	Prolonged inhalation of excessive amounts of dust may cause lung damage. Use of this product as intended dose not result in inhalation of excessive amounts of dust.
<b>Medical Conditions Generally known to be Aggravated by Exposure:</b>	Not known.
<b>Indication of Any Immediate Medical Attention and Special Treatment Needed:</b>	None

---

**SECTION 5 FIRE FIGHTING MEASURES**

---

**Extinguishing Media:**

**Suitable Extinguishing Media:** Carbon dioxide, water, foam, dry chemical

**Unsuitable Extinguishing Media:** None

**Special Hazards:**

It may form explosive dust-air mixtures when finely dispersed in air.

**Hazardous Combustion Products:**

Toner, like most organic powders, is capable of creating a dust explosion when particles are dispersed. Carbon monoxide and carbon dioxide are hazardous resulting gases.

**Advice for Fire-fighters:**

Wear gloves, glasses and a mask if necessary.

---

**SECTION 6 ACCIDENTAL RELEASE MEASURES**

---

**Personal Precautions, Protective Equipment and Emergency Procedures:**

Avoid dust formation. Do not breathe dust.

Wear personal protective equipment as described in Section 8.

**Environmental Precautions:**

Do not discharge into drains.

**Methods and Material for Containment and Cleaning Up:**

Eliminate source of ignition and flammables. Vacuum or sweep the material into a sealed container. If a vacuum cleaner is used, it must be dust explosion-proof. Dispose of the material in accordance with Federal/state/local requirements.

**Reference to Other Sections:**

Refer to section 13.

---

**SECTION 7 HANDLING AND STORAGE**

---

**Precautions for Safe Handling:**

Keep out of reach of children.

Avoid dust formation. Handle in adequately ventilated areas.

Do not breathe dust. Do not get in eyes or on skin.

Keep away from excessive heat and sources of ignition such as sparks and open flames.

Ensure all the equipment is electrically earthed/grounded before beginning operation.

**Conditions for Safe Storage, Including Any Incompatibilities:**

Keep out of reach of children.

Keep container closed and store at room temperature.

Keep away from excessive heat and sources of ignition.

Do not store with strong oxidizers.

**Specific End Uses:**

This product is a toner used in printers/copiers.

**SECTION 11 TOXICOLOGICAL INFORMATION**

---

**Information on Toxicological Effects:****Acute Toxicity:****Inhalation:** No test data available**Ingestion:** No test data available**Skin:** No test data available**Corrosivity/Irritation:****Skin:** No test data available**Eye:** No test data available**Sensitization:****Skin:** No test data available

**Repeated Dose Toxicity:** No test data available.  
In a study in rats of chronic inhalation exposure to a typical toner, a mild to moderate degree of lung fibrosis was observed in 92% of the rats in the high concentration (16mg/m<sup>3</sup>) exposure group. And a minimal to mild degree of fibrosis was noted in 22% of the animals in the middle (4mg/ m<sup>3</sup>) exposure group. But no pulmonary change was reported in the lowest (1mg/ m<sup>3</sup>) exposure group, the most relevant level to potential human exposures. (Muhle et al.)  
The quantity of toner exhausted with the normal use of this product is estimated less than 1mg/m<sup>3</sup> per day.

---

<b>Carcinogenicity:</b>	No test data available. IARC has issued a notice that they will publish a monograph that lists titanium dioxide (TiO <sub>2</sub> ) as possibly carcinogenic to humans (Group 2B) by inhalation (based solely on animal data). Human epidemiology studies do not suggest an increased risk of cancer in humans for occupational exposure to titanium dioxide. IARC stated that exposure levels are assumed to be lower in the user industries, with the possible exception of workers who handle large quantities of titanium dioxide. No significant exposure to titanium dioxide is thought to occur during the use of products in which titanium dioxide is bound to other materials, such as in paints. <sup>3)</sup>
<b>Mutagenicity:</b>	Based on the result of Ames test (Salmonella typhimurium TA98,TA100,TA1535,TA1537, E.coli WP2 uvrA), this product has negative mutagenicity. <sup>1)</sup>
<b>Toxicity for Reproduction:</b>	No test data available

<b>Toxicity:</b>	No data available
<b>Persistence and Degradability:</b>	No data available
<b>Bioaccumulative Potential:</b>	No data available
<b>Mobility in Soil:</b>	No data available
<b>Results of PBT and vPvB Assessment:</b>	No results that the component(s) of this product meet(s) the PBT or vPvB criteria under Regulation (EC) No 1907/2006.
<b>Other Adverse Effects:</b>	No data available

---

**SECTION 13 DISPOSAL CONSIDERATIONS**

---

<b>Waste Treatment Methods:</b>	Waste material may be dumped or incinerated on condition that meets all country, state and local environmental regulations. Recommendation: Consult with the disposal agency and the relevant authorities; cleansing agent is water.

### SECTION 4 FIRST AID MEASURES

**First Aid Measures:**

<b>Inhalation:</b>	Provide fresh air immediately. If symptoms occur, seek medical advice.
<b>Ingestion:</b>	Clean mouth out with water. Drink several glasses of water. If sickness develops, seek medical advice.
<b>Skin:</b>	Wash out particles with plenty of water and soap. If irritation develops, seek medical advice.
<b>Eye:</b>	Do not rub eyes. Immediately rinse with plenty of clean running water until particles are washed out. If irritation persists, seek medical advice.

**Most Important Symptoms and Effects, both Acute and Delayed:**

<b>Inhalation:</b>	Exposure to excessive amounts of dust may cause physical irritation to respiratory tract.
--------------------	---

**Ingestion:** Practically non-toxic. Ingestion is a minor route of entry for intended use of this product.

**Skin :** May be non-irritant.

**Eye:** May be non-irritant.

**Chronic Effects:** Prolonged inhalation of excessive amounts of dust may cause lung damage. Use of this product as intended dose not result in inhalation of excessive amounts of dust.

**Medical Conditions Generally known to be Aggravated by Exposure:** Not known.

**Indication of Any Immediate Medical Attention and Special Treatment Needed:** None

## SECTION 5 FIRE FIGHTING MEASURES

### Extinguishing Media:

**Suitable Extinguishing Media:** Carbon dioxide, water, foam, dry chemical

**Unsuitable Extinguishing Media:** None

**Special Hazards:** It may form explosive dust-air mixtures when finely dispersed in air.

**Hazardous Combustion Products:** Toner, like most organic powders, is capable of creating a dust explosion when particles are dispersed. Carbon monoxide and carbon dioxide are hazardous resulting gases.

**Advice for Fire-fighters:** Wear gloves, glasses and a mask if necessary.

## SECTION 6 ACCIDENTAL RELEASE MEASURES

**Personal Precautions, Protective Equipment and Emergency Procedures:** Avoid dust formation. Do not breathe dust.

Wear personal protective equipment as described in Section 8.

**Environmental Precautions:** Do not discharge into drains.

**Methods and Material for Containment and Cleaning Up:** Eliminate source of ignition and flammables. Vacuum or sweep the material into a sealed container. If a vacuum cleaner is used, it must be dust explosion-proof. Dispose of the material in accordance with Federal/state/local requirements.

**Reference to Other Sections:** Refer to section 13.

## SECTION 7 HANDLING AND STORAGE

**Precautions for Safe Handling:** Keep out of reach of children.  
Avoid dust formation. Handle in adequately ventilated areas.  
Do not breathe dust. Do not get in eyes or on skin.  
Keep away from excessive heat and sources of ignition such as sparks and open flames.  
Ensure all the equipment is electrically earthed/grounded before beginning operation.

**Conditions for Safe Storage, Including Any Incompatibilities:** Keep out of reach of children.  
Keep container closed and store at room temperature.  
Keep away from excessive heat and sources of ignition.  
Do not store with strong oxidizers.

**Specific End Uses:** This product is a toner used in printers/copiers.

**Information on Toxicological Effects:****Acute Toxicity:****Inhalation:** No test data available.**Ingestion:** No test data available.**Skin:** No test data available.**Corrosivity/Irritation:****Skin:** No test data available.**Eye:** No test data available.**Sensitization:****Skin:** No test data available.

<b>Repeated Dose Toxicity:</b>	<p>No test data available.</p> <p>In a study in rats of chronic inhalation exposure to a typical toner, a mild to moderate degree of lung fibrosis was observed in 92% of the rats in the high concentration (16mg/m<sup>3</sup>) exposure group. And a minimal to mild degree of fibrosis was noted in 22% of the animals in the middle (4mg/ m<sup>3</sup>) exposure group. But no pulmonary change was reported in the lowest (1mg/ m<sup>3</sup>) exposure group, the most relevant level to potential human exposures. (Muhle et al.)</p> <p>The quantity of toner exhausted with the normal use of this product is estimated less than 1mg/m<sup>3</sup> per day.</p>
<b>Carcinogenicity:</b>	<p>No test data available.</p> <p>In 1996 the IARC reevaluated carbon black as a Group 2B carcinogen (possible human carcinogen). This classification is given to chemicals for which there is inadequate human evidence, but sufficient animal evidence on which to base an opinion of carcinogenicity. The classification is based upon the development of lung tumors in rats receiving chronic inhalation exposures to free carbon black at levels that induce particle overload of the lung. Studies performed in animal models other than rats did not show any association between carbon black and lung tumors. Moreover, a two-year cancer bioassay using a typical toner product containing carbon black demonstrated no association between toner exposure and tumor development in rats.</p> <p>IARC has issued a notice that they will publish a monograph that lists titanium dioxide (TiO<sub>2</sub>) as possibly carcinogenic to humans (Group 2B) by inhalation (based solely on animal data). Human epidemiology studies do not suggest an increased risk of cancer in humans for occupational exposure to titanium dioxide. IARC stated that exposure levels are assumed to be lower in the user industries, with the possible exception of workers who handle large quantities of titanium dioxide.</p> <p>No significant exposure to titanium dioxide is thought to occur during the use of products in which titanium dioxide is bound to other materials, such as in paints. <sup>3)</sup></p>
<b>Mutagenicity:</b>	<p>Based on the result of Ames test (Salmonella typhimurium TA98,TA100,TA1535,TA1537, E.coli WP2 uvrA), this product has negative mutagenicity. <sup>1)</sup></p>

"Carbon black (airborne, unbound particles of respirable size)" is a California Proposition 65 listed substance. Please note that all three listing qualifiers (airborne, unbound (not bound within a matrix), and respirable size (10micrometers or less in diameter)) must be met for this substance to be considered a Proposition 65 substance. The carbon black in this product is bounded within resin matrix.
