

## Material Safety Data Sheet

1/3

MSDS No.: RT004-05YS

Date • **Revision** : 2001.05.15

### 1. PRODUCT AND COMPANY IDENTIFICATION

Manufacturer :Fuji Xerox Co., Ltd  
Address :Akasaka Twin Tower East,  
17-22, Akasaka-2-choume,  
Minato-ku,Tokyo,Japan 107-0052

Distributor's Name:  
MINOLTA-QMS, Inc.  
One Magnum Pass  
Mobile,AL 36618

Emergency Telephone Number:  
1-800-622-5546

Product Name:

JAPAN: magicolor 330

Toner(Black)

ASIA PACIFIC REGION:

### 2. COMPOSITION, INFORMATION ON INGREDIENTS

Chemical Nature:

| Chemical Name        | Ingredients (% by wt.) | CAS Registry Number |
|----------------------|------------------------|---------------------|
| Polyester            | 70-75                  | —                   |
| Cu-Zn ferrite powder | 25-30                  | —                   |
| Carbon black         | < 5                    | 1333-86-4           |
| Titanium dioxide     | < 1                    | —                   |
| Amorphous silica     | < 1                    | —                   |

UN Hazard Class : None

UN Number : None

### 3. HAZARDOUS IDENTIFICATION

Physical and Chemical Hazard: There are no significant hazards associated with this product.

Adverse Human Health Effects: There are no significant hazards associated with this product.

Environmental Effects: There are no significant hazards associated with this product.

### 4.FIRST-AID MEASURES

Eye contact : Flush with a large amount of water for at least 15 minutes. Seek medical advice.  
Skin contact : Wash with soap and water.  
Inhalation : Remove from exposure and provide fresh air. Rinse mouth with water.  
Ingestion : Rinse mouth with water. Give several glasses of water to drink and seek medical advice.

---

## 5. FIRE-FIGHTING MEASURES

---

Specific method : In case of fire use extinguishing media.  
When in a machine, treat as an electrical fire.

Extinguishing media : Water spray, Foam, Dry chemicals

---

## 6. ACCIDENTAL RELEASE MEASURES

---

Shut off ignition sources. For small spills, sweep up or soak up with damp cloth.  
For large spills, wear proper protective equipment and place waste material in closed container.  
Dispose of in accordance with federal, state and local regulations.

---

## 7. HANDLING AND STORAGE

---

Handling : Do not incinerate toner or a toner cartridge. Do not disassemble a cartridge.

Storage : Keep in cool, dry and well-ventilated area. Keep out of reach of children.

---

## 8. EXPOSURE CONTROL / PERSONAL PROTECTION

---

Control Parameter  
ACGIH TLV (1999) : 10 mg/m<sup>3</sup> (Total)  
3 mg/m<sup>3</sup> (Respirable)

Precautionary Measures : None required when used as intended in Fuji Xerox equipment.  
For use other than normal customer operating procedures (such as in bulk toner processing facilities), local exhaust ventilation may be required.

Personal Protective Equipment: None required when used as intended in Fuji Xerox equipment.  
For use other than normal customer operating procedures (such as in bulk toner processing facilities), protective glove, goggles and respirators may be required.

---

## 9. PHYSICAL AND CHEMICAL PROPERTIES

---

|                                       |                           |                        |                |
|---------------------------------------|---------------------------|------------------------|----------------|
| Appearance/Odor:                      | Black Powder / Faint Odor |                        |                |
| Boiling Point(OC):                    | Not applicable            | Vapor Pressure:        | Not applicable |
| Volatile (%):                         | Not applicable            | Softening Point:       | 85-100°C       |
| Specific Gravity(H <sub>2</sub> O=1): | Not available             | Initial Boiling Point: | Not applicable |
| Solubility in water:                  | Negligible                | Other Data:            | None           |

---

## 10. STABILITY AND REACTIVITY

---

|                                                    |                                                                                                     |                            |                |
|----------------------------------------------------|-----------------------------------------------------------------------------------------------------|----------------------------|----------------|
| Flash Point(OC)                                    | : Not applicable                                                                                    | Auto-Ignition Temperature: | Not applicable |
| Explosion Limit                                    | : Not applicable                                                                                    |                            |                |
| Flammability                                       | : Not flammable under conditions of use                                                             |                            |                |
| Spontaneous Combustibility / Reactivity with water | : None                                                                                              |                            |                |
| Self-reactivity / Explosive                        | : None                                                                                              |                            |                |
| Dust Explosive                                     | : Like most organic materials in powder form, it can form explosive mixtures when dispersed in air. |                            |                |
| Stability and Reactivity                           | : Stable                                                                                            |                            |                |
| Other Data                                         | : None                                                                                              |                            |                |

## 11. TOXICOLOGICAL INFORMATION

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                  |                                                       |

| Chronic Toxicity : The results obtained from a Xerox sponsored, Chronic Toner Inhalation Study, demonstrated no lung change in rats for the lowest (1mg/m <sup>3</sup> ) exposure level (i.e. the level most relevant to potential human exposure). A very slight degree of fibrosis was noted in 25% of the animals at the middle (4mg/m <sup>3</sup> ) exposure level, while a slight degree of fibrosis was noted in all the animals at the highest (16 mg/m <sup>3</sup> ) exposure level. These findings are attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lungs for a prolonged period. This study was conducted using a special test toner to comply with EPA testing protocol. The test toner was ten times more respirable than commercially available Xerox toner, and would not be functionally suitable for Xerox equipment. <sup>1)</sup> |                                                                  |                                                       |
| Carcinogenicity : Carbon Black is classified as "Group 2B(possibly carcinogenic to humans)" by IARC. But we obtained the results from a Chronic Toner Inhalation Study, that commercially available Xerox toner has no evidence of human carcinogens. All other ingredients are not classified as "Carcinogens" <sup>ref.1)</sup> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                  |                                                       |
