

FREE On-Site Networking Survey

THE BASIC SURVEY

The demand for technology in education has never been greater and the effect of a dated infrastructure never more noticeable.

IT Managers in education face unique challenges, such as extensive grounds, multiple buildings and many users. And now there is the BYOD challenge to take on board – Is your network able to support this growing trend?

Cost savings are always at the top of every IT agenda. Schools must demand more reliable, scalable and affordable solutions from their technology spending.

NETGEAR is offering a *FREE** On-site Networking Survey to schools and other education establishments, to help solve these issues.

The Survey

The Survey will be conducted by an experienced pre-sales engineer. It will include:

- Examination of networking infrastructure
- Signal testing across school
- Assessment of network security
- Detailed report highlighting any issues and documenting recommendations

Survey Results

Customers will be presented with a report** detailing:

- A review of current network. Highlighting possible issues and trouble spots
- Recommendations for network improvement
- Detailed solution proposal to include the number of devices and locations
- Network diagram (if required)

* No obligation

** We aim to provide the reports to the client within seven working days of the survey
